

COPAL OGL 2

Grease

Extreme pressure adhesive aluminium complex grease with solid lubricants for heavy-duty applications.

APPLICATIONS

**Heavy duty grease,
water resistant**

Recommendation

- **COPAL OGL 2** is a predominantly designed for use on open gears, in case where an NLGI 2grade is required.
- **COPAL OGL 2** can be used as a priming lubricant for gears of kilns, mills,...
- **COPAL OGL 2** can be used as well in plain bearings highly loaded in the most severe conditions. (shocks,high loads, high amount of water,...) or for application requiring a highly adhesive grease (fifth wheel,...).
- Preferably use a pneumatic pump system. **COPAL OGL 2** can be applied by hand with brushes, or other adapted tools. A good cleanliness of tools is recommended for optimal lubrication.

SPECIFICATIONS

- ISO 6743-9: L-XBDEB 2
- DIN 51502: OGPF2N-15

ADVANTAGES

**High load resistance
High adhesiveness**

**Water resistance
No harmful substance**

- Excellent adhesiveness, associated with the very good resistance to high loads and repeated shock loadings, **COPAL OGL 2**, gives a high protection level against wear on gear teeth and plain bearings, increasing significantly the service life of the equipment.
- **COPAL OGL 2** contains solid lubricants, decreasing friction coefficient, limiting wear particularly near the tooth crest and tooth base, decreasing energy consumption.
- Good behaviour in presence of water even under pressure.
- **COPAL OGL 2** does not contain lead, or other heavy metals considered harmful to human health and the environment.
