CONFERENCES & NETWORKING

GEN-SETS | CHP | DATA CENTRES | CONSULTANTS

6TH OCTOBER 2021, PARK PLAZA, LONDON

GEN-SET LIVE | **CHP LIVE** | **CHP & RENEWABLES LIVE**

www.powerexlive.co.uk

Organiser's note

Power Media International Group are proud to announce themselves as new owners of PowerEx Live and have also recently completed the successful purchase of GMP's power division of 21 years including the flagship magazines WiP & UK Power News as well as other regional magazines. With the same experienced team on board we hope this to be a very successful event.
PowerEx Live 2021 aims to feature the unique convergence of traditional players alongside the newly advanced independent power leaders at one of London's premier exhibition locations. This event aims to bring you an unrivalled line up of world-class suppliers to the Gen-Set and CHP sectors, hundreds of hours of exclusive content from some of the industry's leading practitioners alongside prime peer networking opportunities.

Product Sectors

The global Gen-Set market is forecasted to gain a massive Compound Annual Growth Rate over the forecast period to 2023. The growth of the market can be attributed to several key factors. Utilities across the globe have begun to utilise Gen-Sets in order to enhance their efficiency and operational level. Over the years, generators have witnessed more and more popularity in commercial and industrial applications as they offer a continuous power supply, one which is a highly important component of any manufacturing facility.

GENSETS

CHP

Governments in different regions are promoting cogeneration technology through various long-term policies, and financial incentives which drive the market in the upcoming period. Furthermore, presence of a large number of companies offering diverse products and services related to CHP installations is fueling competition in the global CHP installation market. Europe accounts for one of the largest installed bases of cogeneration power plants in the world and continue to dominate the market of combined heat and power (CHP). The region is a global leader in micro-CHP engine with innovation and manufacturing centers in Germany, the Netherlands and the U.K.

The market for data centres across Europe is growing. In fact, in the UK, Germany and the Netherlands, capacity is increasing faster than ever. While London and the Inner M25 area is the largest area of data centre space, with 260,000 square metres, followed by Slough at 107,000 square metres, other clusters include Cardiff, Manchester, Woking, and Farnborough. New data centre space is also emerging in Edinburgh, Leeds, and Newcastle. Portsmouth and Gloucester have opened data centre facilities within the last year. A paper by techUK argues that data centres underpin the digital economy, improving productivity and generating employment across multiple business centres.

DATA CENTRES

CONSULTANTS

The utilities market was the hot sector for consultants with a healthy level of consulting market growth. While consultants were busy across the board in this sector, tech-driven transformation was the name of the game. On the whole, energy & resources consultants are feeling positive about the year ahead. The market will likely remain challenging, but there is an expectation that the current trend for business transformation projects will continue. Utilities will remain the key driver of growth, and technology is expected to remain at the forefront of opportunities for consultants in the industry.

Conferences

PowerEx Live looks to host some of the finest minds with the most cutting-edge content within the industry. It aims to probe and discuss all the trends, opportunities and challenges for the Gen-Set, CHP and Renewables industries.

Networking

MEET face-to-face with exclusive and leading technological experts within the Gen-Set & CHP sectors, all whilst expanding your company's presence within the power market.

AMPS

Co-located with AMPS Awards Dinner

EXHIBIT PROFILE:

Generating Sets
Acoustic Treatment
Alternators
Batteries
Emissions
CHP/Cogeneration
Control & Monitoring Equipment
Diesel Engines
District Heating
Environmental Solutions
Fuel Systems
Filtration
Gas Engines
Gas/Steam Turbines
Governors
Heat Exchangers
Hire & Rental Equipment
Load Banks
Noise, Acoustic Equipment
Radiators
Repair / Hire / Maintenance
Renewables
Services
Silencers
Switchgear
Test Equipment
Turnkey Solutions
UPS Systems

VISITOR SECTOR:

Blue Chip Companies
Construction
CHP/Cogeneration
Data Centres
Defence
Education
Electrical
Emergency Services
End Users
Energy
Fuel Cells
Hospitals
Industrial/Manufacturing
Local/Central Government
Maintenance
OEMs
Power Generation
Prisons
Renewables
Retail
Software
Telecommunications
Transport
Utilities (Gas/Water/
Waste Heat Recovery Electricity)

JOB FUNCTION:

Consultants
Architectural Engineers
Buyers Specifiers Decision-makers
Power Contractors
Technical Directors
End Users
Apprentices
Specifiers Design Engineers
Electrical Engineers
General Managers
Contractors
Project/Contract Managers
Maintenance
Facilities Managers
Agents
Managing Directors
Chief Engineers
Directors Service Managers
Financial Marketing
Students

GEN-SET LIVE | CHP LIVE | CHP & RENEWABLES LIVE

BUSINESS

Optimal trade opportunities available - meet regional and global buyers, distributors and contractors.

NETWORKING

An event offering all key sector players to assess new trends, connect and develop at a world-class venue!

CONFERENCES

3 dedicated conferences under 1 roof, in one day! Don't miss out on the latest assessments from the top industry speakers.
