Chopper's Choice™ - Buchneri Inoculant

Directions for Use

- Recommended for use on corn silage, high moisture corn and snaplage.
- Always follow good management practices: harvest at proper maturity, chop length, processing, and optimum moisture level.
- Carefully follow the applicator instructions.
- Apply Chopper's Choice™ Buchneri Inoculant at the rate to deliver the contents of 1 jar per 200 tons of corn silage or 133 tons of high moisture corn or earlage. One scoop treats 10 tons of corn silage or 6.6 tons of HMC as harvested.
- Mix to completely dissolve the correct amount of product in a clean container.
- Discard unused solution after 8 hours.

Storage Recommendations

Keep refrigerated until used. Under refrigeration use within 18 months of manufacturing date.
