## Important Notes

---

1. Toilets need to be sited on level ground to ensure they will function correctly.
  2. Our delivery vehicles are transit sized and toilets cannot be moved very far once taken off the vehicle so we need to get the vehicle close to where you wish the toilets to be sited.
  3. Our toilet units are 4ft wide; please bear this in mind if you have gates/passages that they need to be taken through.
  4. Our toilets are too large to be carried over walls or other obstacles so if this is likely to be a problem please mention it.
  5. We can maneuver toilets over lawns however we cannot guarantee that your grass will not be damaged.
  6. All toilets have a small sink for hand washing, the sink contains its own water which is limited but it can easily be refilled on site with a garden hose or watering can. Due to the weight of water in the sinks when they are full we do not fill them to their maximum level. If you wish to know how to fill the sinks in case they run out our delivery driver will show you or you can phone us and we can explain how to do it.
  7. Our toilet units do not have interior lighting, however it can be provided on request. The toilet roofs are translucent and allow through a lot of exterior light so if they are positioned under a good light source they can be used in darker conditions without the need for interior lights.
  8. We understand that sometimes it is not possible for our customers to be present when we deliver toilet units, however if you cannot be there to show us where the toilets need to be situated then please ensure that it is obvious where they must go as we may not be able to return to move toilets when we have left site.
  9. Please be aware you are responsible for the unit during the duration of hire, any damages must be paid for.
  10. Finally we would like to thank you for choosing to use D-tox to supply your portable toilet units and we would like to take this opportunity to wish you every success with your event. Whatever the occasion we hope it is memorable.
