The Royal Society for the Prevention of Accidents

 **NCCB** National Core Competence Benchmark

Issued September 2011 

**THE ONLY INDUSTRY SPECIFIC
HEALTH AND SAFETY TRAINING
ACCREDITED BY ROSPA IN THE UK**

The NSQ (National Sanitation Qualification) is a Health and Safety training scheme created specifically for the Portable Sanitation Industry. It has been developed by the PSE in partnership with Human Focus International who are accredited by RoSPA and specialise in Health and Safety training.

Through our membership in Portable Sanitation Europe we have been able to train all our staff in the NSQ scheme so you can rest assured that when any of our staff attend your site they will be fully competent in any relevant Health & Safety training procedures.

There are currently six training modules which our staff have been trained in:

- Slips, Trips & Falls - Basic First Aid - Manual Handling - PPE -
- Servicing of Portable Sanitation Products - H&S in Construction

All NSQ qualified personnel are issued with a smartcard which identifies them and can be used to check their qualifications by going online to the address below:
