

## Portable 'Pee Pod' Urinal

**For all events that are expecting a large amount of male attendees (and especially where alcohol is being consumed) the Pee Pod urinal is a great product to have at site.**

Each Pee Pod has 4 urinal points allowing 4 people to use them at any time. Their ergonomic design means users can use them in public view but still retain their modesty.

The presence of Pee Pods at any event cuts down on the amount of men using the portable toilets which means the queues for the toilets are shorter and the toilets remain sanitary for a longer period.

Pee Pods can be linked together which allows the service company to empty at just one point rather than having to empty every urinal. This cuts down servicing time and also allows the urinals to be emptied away from pedestrian traffic, if desired. Pee Pods are also stackable which means that more can be transported per load keeping delivery costs low.

They can now be supplied with hand sanitiser dispensers as an optional extra.

- Large capacity
- Linkable - for easier emptying
- Many colours available to order
- Privacy fins and hand sanitiser poles available as extra options
- Nestable for easy storage and transportation

### Hand Sanitiser Unit

Further enhance the user experience by selecting the optional Pee Pod Pole, which features 4 x 400ml dispensers for hand sanitising fluid mounted on a 6' 7" (200cm) tall stainless steel pole. Positioned in the centre of the Pee Pod, the pole also features space for a sign or flag to display your marketing message or brand.
