

SOULARIUM

A PORTAL FOR SOUL ADVANCEMENT

AWA LIGHTING DESIGNERS

Contextualizing Light • Since 2002

WHAT IS SOULARIUM?

Soularium is an immersive light, color & sound installation for improving public health. It is designed to provide sensory experiences that de-stresses and realigns the body, mind and soul. So, how does it work? This project harnesses the wisdom and knowledge of scientists, physicians, psychologists, musicians, chroma-therapists, and projection artist to create a 20-minute experience, with the serious intent of helping the community with their stress which can be induced by many reasons, reducing it and re-channeling it by using the science of healing that has been handed to us through the prisms of many different cultures. The sequence opens and closes with a 5 minute guided meditation lead by instructors from the Derosé Method.

WHY DOES SOULARIUM EXIST?

Soularium exists to help at many levels:

- Personal, Yet Universal: Soularium perceives individual as well as the all-inclusive, aligning with our hierarchy of needs.
- The desired outcome of Soularium is transformation of your physiological and psychological well-being.
- Soularium provides an experience that allows you to transcend the ordinary and realize the interconnectedness with the oneness of life.
- Most of us are always getting caught up in everyday demands, never-ending goals & hectic schedules. The constant busyness imbalances our physical, emotional, and mental health. Soularium helps restore this balance.
- We are constantly getting distracted by the news, emails, social media feeds & notifications that demand our attention. Soularium provides a respite from this information deluge.

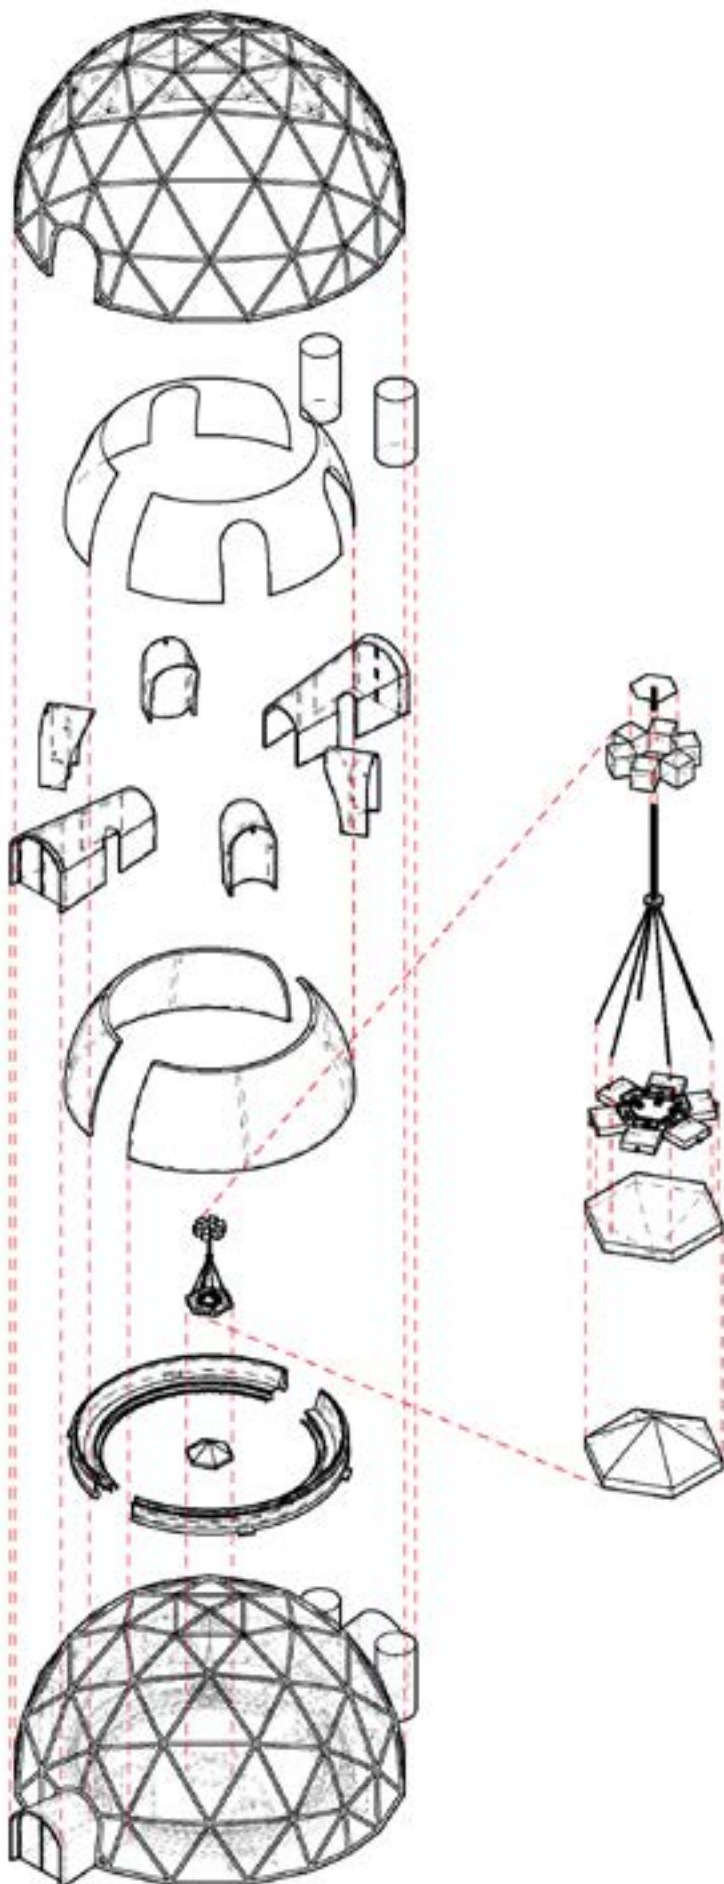

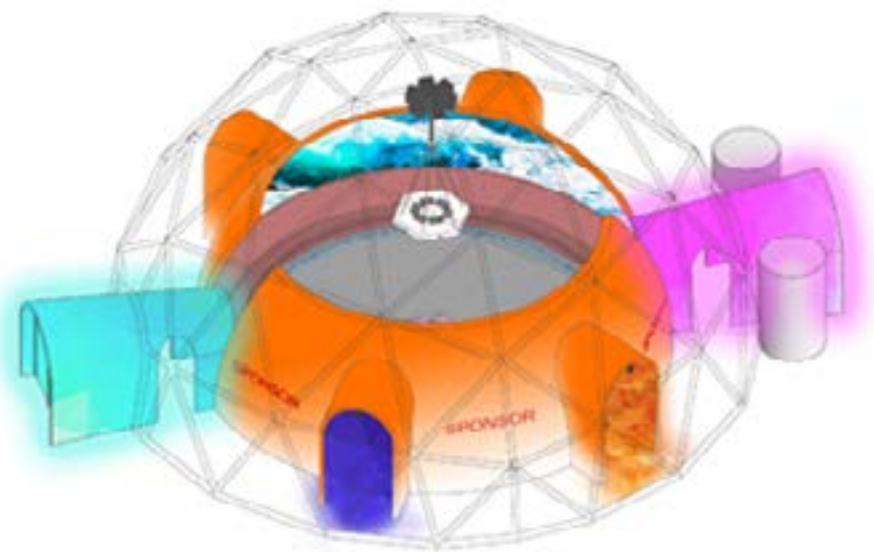

Maslow's Hierarchy of Needs - Soularium helps on all levels

CORE ELEMENTS OF SOULARIUM

- Chromatherapy
- Super-Wavelengths of Light
- Lateral Color Therapy
- Healing Frequencies
- Elements from Nature
- Sounds: Planets, Chants, & Gongs

THE PROOF IS IN THE PUDDING

Since we started the self-funded work on Soularium, we have completed two temporary installations- One in Croatia in September 2019, and the other at Gallery AWA in NYC in December 2019. These installations are titled “You Are The Miracle.” Please enjoy the video with the highlights and testimonials. Hopefully, you will agree that there is enough evidence here to arrive at an empirical conclusion - this installation helps people. The proof is in the pudding! We had two more planned for the fall this year, but that will definitely be delayed due to COVID-19. Please stay tuned for an updated schedule post COVID-19

JOIN THE TEAM

We at AWA feel that the need of our zeitgeist is to serve people with our unique skillsets in lighting, health and architecture. Our goal is to take Soularium worldwide. We currently have one experience that is fully developed and operational, called “You are the Miracle.” We have three more in the pipeline. Soularium is meant to be an open-source space in the long-term- initially, it will show our healing programs, while creating a database of experiences contextualized for the local population through local artists and technicians.

Soularium comes in 4 sizes (see modular design chart below.) The costs and BOQ for Soularium have been developed. It is a modular design and can be implemented anywhere in the world. The benefactor that chooses to support us will need to sponsor the installation and operation of Soularium for a period of 3 months minimum. They will be permitted to use their branding collateral in certain locations, and they will be fulfilling a major social responsibility of providing emotional and mental support to their audience in such trying times.

Let us turn this into a movement to help people in our communities. If you think you would like to join this movement, please write to us at newyork@awalightingdesigners.com, and let's talk.

MODULAR DESIGN

INSTALLATION (Temporary / Permanent)	
SCALE	Number of People
SMALL (24' dia)	24
MEDIUM (36' dia)	40
LARGE (48' dia)	54
X-LARGE (72' dia)	84

Please contact us for costs of installation.

All Spaces Are Provided With Built-In UV-C Germicidal Light Protection
