

PetExec 3.8 to the Rescue!

New Feature — Curbside Service

Pet parents can easily notify you when they are minutes away or at the door. Now picking up and dropping off a pet is a walk in the park.

Businesses can manage their curbside notifications to easily see estimated arrival times, delayed arrivals, and owners who have arrived.

Manage Curbside Events ? 🚗

Enhanced Employee Notifications in PetExec 3.8

PetExec makes sure that you have more options to receive communications from these additional notification types:

- Employee Record Added/Modified/Deleted
- Employee Type Record Added/Modified/Deleted
- Curbside Notification
- Bounced Email(s)
- Recurring Billing Failed

We have created categories for notification types on the Maintain Employee Type page making it easier to manage notifications.

Enhanced downloadable spreadsheet formatting

We've added consistent headers, additional filter options, and provided a better printing format.

Even more enhancements in PetExec for our Packmates

- More logging in Owner Communications.
- New Deleted Boarding Totals report.
- Improved Payroll Reporting enhancements.
- Major infrastructure enhancements which sets the stage for additional speed, reliability and growth for PetExec.

Our amazing Packmate clients have been trusting us for 14 years to keep bringing remarkable feature enhancements.
