

Hello,

I'm Taalib, a user experience designer from London. I help teams understand their users and make things that exceed their expectations.

My Experience

Elsevier (Current role)

Lead UX Designer (Contract) | 03/2020

I have been leading the design of a tool that helps medical students prepare for the complexity and pressure of working as a clinician. More specifically on helping them develop their clinical reasoning skills.

I have also been leading the design of a product that is a bit like wikipedia and duolingo, but for medical students. I am responsible for user research through to detailed user interface design. All whilst keeping stakeholders aligned and inspired.

Digital Shadows

Lead UX Designer (Contract) | 1 year

Helping security analysts keep their companies safe. Responsible for understanding how best to alert analysts of digital risks so as to help them action on them appropriately.

I have 8 years experience in UX focussed roles. I enjoy working with and learning from ambitious teams.

Eql health

Lead Designer (Contract) | 4 months

Helping those suffering with back problems through diagnosis and treatment. Here I was designer number 1 and the first non founding member to join the team. I designed a triage and treatment app.

Lifepots

Co founder | Ongoing

Helping you live a balanced life. Inspired in part by Johann Hari's book 'Lost connections'. Available for download on the iOS app store.

Mendeley

Senior UX Designer (Contract) | 15 months

Helping researchers wrap their head around complex topics. Whilst here I designed a note taking application amongst other tools.

Get in touch if you're interested in learning more about my experience.

IBM Design

Senior UX Designer | 3 years

Whilst here I worked for IBM Cloud and IBM Interactive experience.

Helping intelligence analysts keep their countries safe, helping medical professionals manage their patients and working for a number of IBM's clients.

CTM Design

Industrial designer | 6 months

Designing luxury jet interiors for the Saudi royal family. Feeling guilty about it all.

PDD Design

Industrial designer | 1 year

Designing a mixture of medical, industrial and commercial products.

Education

Brunel University

Product Design | 1st class honours

With extra modules in human factors and sustainability.
