

		LianJia	ApartmentList	YiRental	Apartments	Zillow	Hotpad	Rent.com	StreetEasy	yad2.co.il	Zumper
Overall Evaluation	Strength	1. The app is very comprehensive and powerful. It is designed for renter, buyer, seller, and people who want to rent out their places. It covers nearly all features a user might need from the moment of finding places, to signing, and moving. 2. You can find a place through location or commute. 3. It gives users very detailed information about the specific housing.	1. Users set the preferences in advance, and the system will generate different lists of available housing based on different categories. This is a perfect response to let users easily see other options. 2. The interaction model is new and fit younger adults' preferences. Users can click 'love it', 'maybe', or 'Nope' on each recommendation.	1. The platform is designed for renter, and people who want to rent out their places. There is no middle broker/agent involved. user generated content. c2c 2. users can post posts to find roommates.	1. #1 website for renters (shows on its website) that has over a million apartments, houses, to choose. 2. Filter is helpful for people to find a suitable housing more efficiently.	1. Have some very interesting filter like View, Waterfront, has basement, and so on.	1. have little icon on the map to indicate house type and using color to differentiate viewed/not viewed. 2. wide range of filters. 3. Has street view. 4. have comparison between apartments.	1. front page provide recommendations based on personas. 2. provide moving option. 3. list out highlight with cute illustrations.	1. can set price range from min to max. 2. high quality photos and floor plans. 3. shows price history. 4. Data dashboard that can be helpful in knowing where to start. 5. each neighborhood has a page that describes the feel and the mood as well as places to go out, etc. 5. for each building shows how many units, stories and the year that was built.	1. overall includes most of the information necessary. 2. has a good filtering system. 3. website has a variety of services like sales, cars, second hand items, furniture, etc. 4. includes apartments for multiple roommates. page specifically	1. includes specific audience type like senior living, student housing, income restricted, etc.
	Weakness	Because the app has so many features, sometimes users might get lost while navigating through the app. The app is also very slow.	1. Users can't see how the community looks like, or what are the commute methods. 2. They can't see all places at once, in the map view. Nor could they change some of the preferences and see their immediate feedbacks. 3. gives user very general information about the housing, its location. Mostly is if it fits their expectation.	1. there is fewer housing options because users are the ones who generate information. 2. users can only filter the selections via 4 options.	1. Recommendations are probably ranked by the the amount of ad money by large apartment. 2. info about neighborhood is very limited and also located and the very bottom of the page.	1. No recommendation based on personal preference. 2. No VR view of the space.	1. didn't list all unit info (floor plan, availability,)	1. no neighbourhood info. 2. no comparison. 3. info shows on map and left side is too little in the map view.	1. restricted only to areas in New York and New Jersey. 2. Filter feature is hidden (small text 'Advanced Options'). 2. not all listing apartments have the same data and features (like about the neighborhood).	1. only in Hebrew. 2. lack of hierarchy and very unorganized.	1. can check availability only by sending a message to the landlord.
