

# PAPUT® SYSTEM

Ultra-portable and lightweight system engineered to simplify on-wing APU testing & troubleshooting

## Troubleshoot and isolate faults without removal of the APU

Eliminate unnecessary repair costs

Avoid catastrophic failure

Trend APU performance

Extend on-wing APU life

## Full data acquisition capabilities

Enables user to perform a full, recordable diagnostic test on APU EGT, RPM (% and actual), 35% & 95% speed indicators, Oil Pressure, Ambient Temperature, Atmospheric Pressure, Main Volts, Main Amps, and full BITE indication.

## Connected and operational in minutes!

1

Connect the DAQ Module to the APU or ESU

2

Connect the USB to the fully digital, ruggedized tablet

3

Run the data acquisition program

# PAPUT® SYSTEM

## Current Production Applications

Sherwood Part Number	Honeywell Part Number	Description	Application Reference
<b>SA709071-100</b>		PAPUT KIT, GTC	GTC85-71A <b>(C-130)</b>
