JTGROUPWA.COM.AU

We put roofs over heads.

But, it's more than a piece of steel. We create roofing products that keep people safe, secure and protected at home and at work.

As a roofing contractor for over 20 years, Jamie saw first hand how easy it was for construction costs to blow out.

He noticed how hard it was to find alternatives in steel. And how the red tape, inflexibility and lack of support at larger steel suppliers caused pointless delays.

He thought he could do better. So, together with his wife Trudi, they built JT Group WA.

Today, JT Group WA has evolved into a strong team. And, while our products are second to none, it's our commitment to your business that we're known for.

Flashings

JT Group WA offer a full range of standard and custom made flashings to suit all your needs from domestic projects to larger industrial buildings.

All custom made flashings are made to order, so you know you will always get the right flashing for your project. Manufactured from zinc-aluminium alloy coated steel, colour coated steels, heritage Galv, stainless Steel, alumiguard, galvanised and aluminium.

Roofing Accessories

Complete your job with our range of quality roofing accessories, designed to complement our full product range including fasteners, building blankets, roof mesh, flue pipes, roof vents, polycarbonate sheeting and more.

JT DIFFERENCE

Now you have a choice.

Until recently, there wasn't a steel product that stacked up to the industry leader.

But that has all changed with

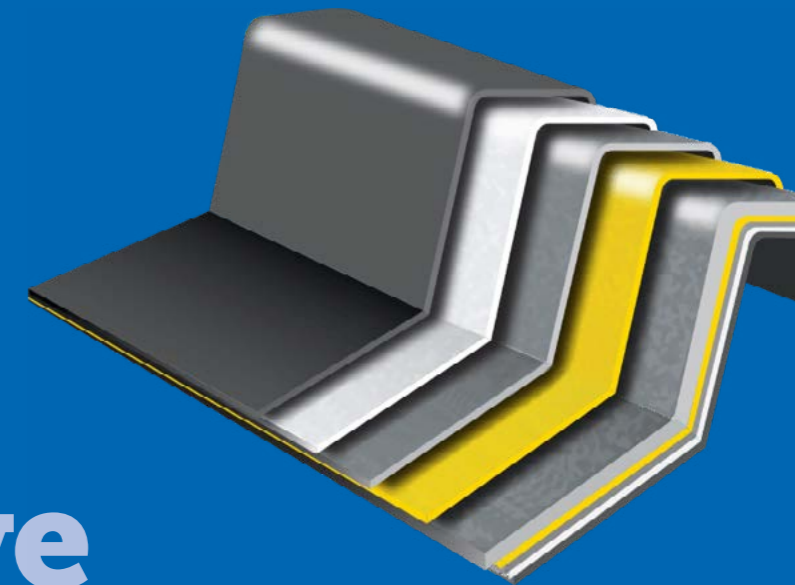

ABOUT

UniCote® was developed by Australia's fastest growing nationally based independent steel distributor, Selection Steel, partnering with one of the world's largest pre-painted steel companies, Dongkuk Steel.

WHY WE USE IT

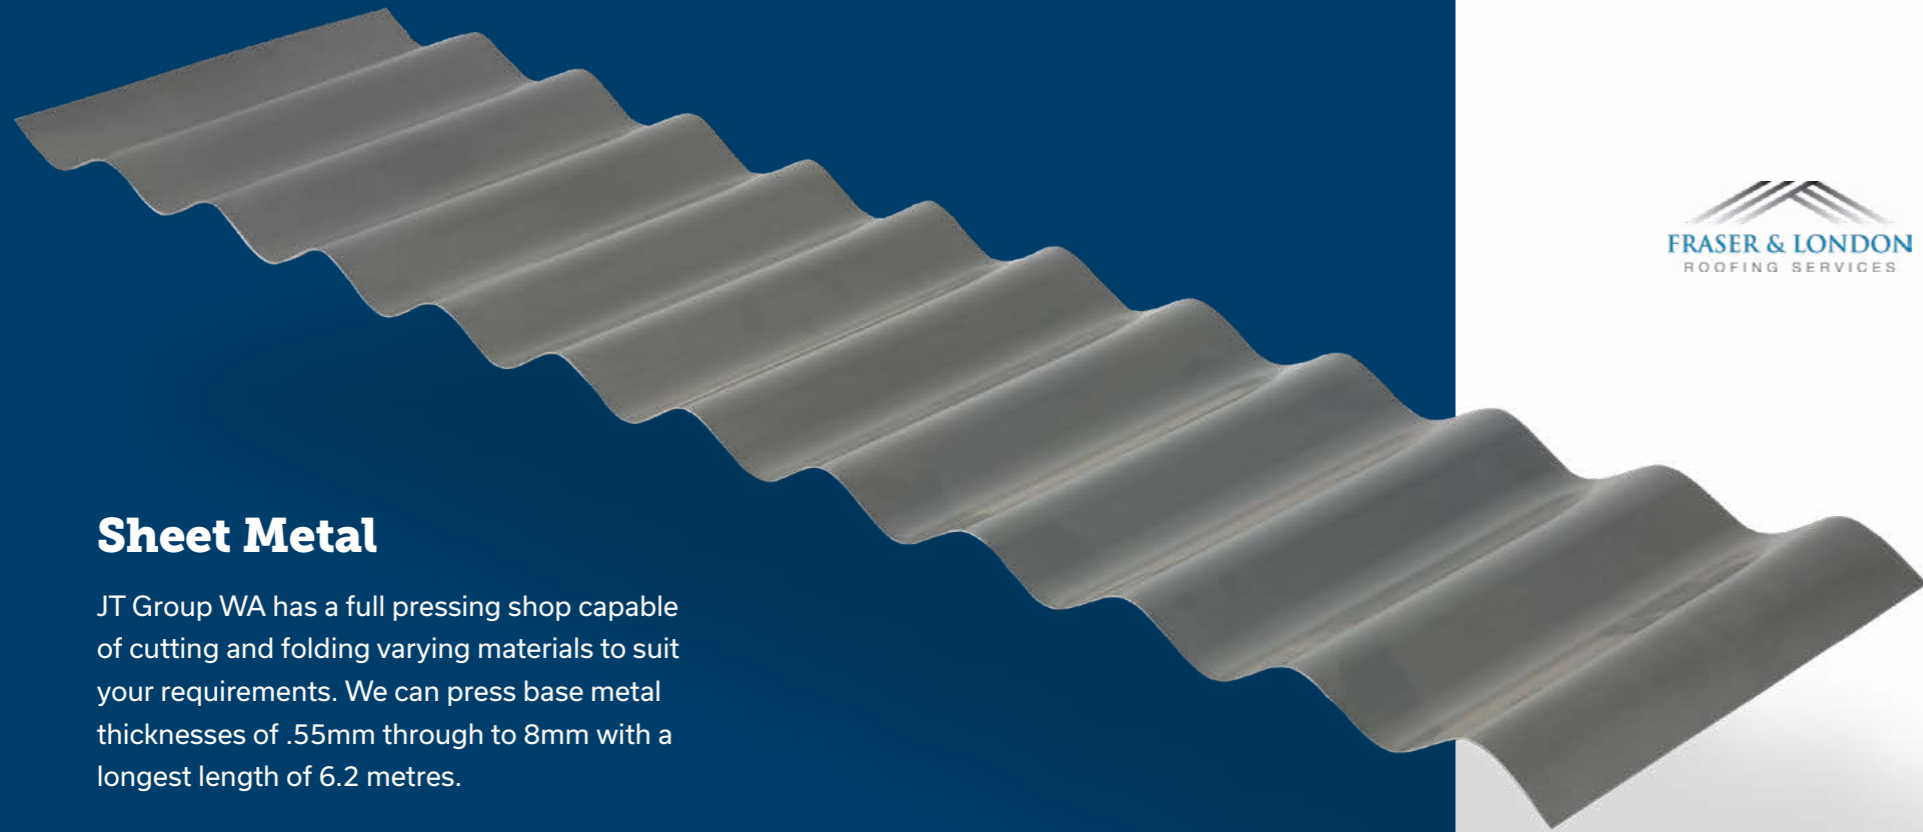

It has passed stringent durability and safety tests with flying colours and its 22 colour range means you don't have to compromise on looks. But the real winner? It offers incredible value, leaving more money in your pocket.

Roll Forming

Our roll formed products are suitable for commercial, domestic and industrial construction roofing and walling purposes and are thoroughly tested to meet all Australian standards. We can also arrange for delivery across Western Australia.

Hundreds of Happy customers.

We have been pleased to partner with JT Group WA in the past as our preferred supplier and have enjoyed a great working relationship that has benefitted both our companies.

Some of the advantages JT Group WA provide are, they offer better value for money products, expert experienced advice, flexible service and quick turn around on products when required, which is essential to making our projects a success. We look forward to continuing to work with JT Group WA in the future.

BEN RICHARDSON
GENERAL MANAGER

Fraser and London Roofing Services are proud to have been partnering with JT Group WA over the past 3 years. We have found their service, pricing and forward-thinking approach extremely helpful to allowing us to run our business in a professional manner. We would recommend Dan Baker and the JT Group WA team to any prospective customer.

PETER FRASER
DIRECTOR

JT Group WA supplied us with 10,000m2 of Magnaflow cladding and accessories for a bulk storage facility at Bunbury Port where access to and around the site was particularly difficult. Therefore, production lead times were often short and timing of deliveries to the site were critical. I will long regard the level of service we received from both the sales and production teams at JT Group WA as being at least equal to the best we have ever experienced.

ALAN CROLL
DIRECTOR AT INDUSTRIAL ROOFING SERVICES

Roof Plumbers Warehouse have been in a business relationship with JT Group WA since their inception. During this time, they have given us a second to none service in all aspects of fulfilling our orders and more importantly our time frames.

Mark and his staff are fantastic in their response. Well done Jamie, you have selected a great crew and they are doing a great job.

DAVE LONDON
MANAGER
