

Careers

Front-End UI Developer

Central, Hong Kong
Full Time

October 2020

Company Description

Remember the last time you tried to open a bank account and felt frustrated by the quantity of paperwork and how long the process takes? That is the industry wide problem you, with Veridate, will work on solving.

Veridate is a fast-growing Software-as-a-Service company with a web application built to take the pain out of Client Onboarding. Veridate has gone from an in-house onboarding tool to a sophisticated and configurable platform which caters to multiple industries. The application is aimed at providing digital transformation to financial institutions and professional services firms while enabling a smooth user experience for digital asset exchanges. Veridate provides a simple onboarding to prospective clients and easy to use back office automation to organisations.

Veridate is at the pivotal moment of transitioning from a fund administration business to the general release of the SaaS application to industry. Powering ahead with client acquisition means that naturally the engineering team is expanding to accommodate the growing client base.

About the team

With offices in Hong Kong in the heart of Central, you will join a small but growing team of young and passionate developers, accounts, sales and product managers all keen to build an epic product and company from the ground up. There is a relaxed but driven work environment with a good sense of camaraderie. Veridate take pride in staff development and training, with knowledge sharing and opportunities to work on all aspects of the platform.

Job Description

As a member of the Engineering team you will:

- Code a visually stunning UI which sets Veridates onboarding technology out from the crowd
- Have a major role in developing the client facing interface Single Page Application
- Develop features for the administration portal including reports, graphs and administration UIs.
- Optimise the speed and efficiency of the SPA
- Ensure cross browser compatibility and cross device consistency
- Work on new and novel technologies in browser based image capture technology
- Work closely with the Software Engineering team to make a slick and easy to use interface
- Implement and contribute to the design wireframes.

Equal Opportunities

Veridate is a fast paced, fun and energetic company that is disrupting the financial services and professional services markets. Veridate treats all employees and job applicants equally. Every decision is based on merit, qualifications, and talent. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, or disability.

The SaaS Platform

The SaaS applications is the solution for full cycle onboarding to enable organisations to onboard their clients quickly, efficiently and at a low cost. By collecting all of the required information through a user friendly UI per client type, Veridate automatically performs ID authentication checks, KYC background checks, AML client risk profiling, monitoring of ongoing regulatory obligations, and much more! By providing the tools and technology, our customer's clients are provided with a superior onboarding experience while our customers can manage their client engagement and KYC in a highly efficient way.

Apply

Please email your CV to careers@veridatefinancial.com and provide a short summary on why you could add value to our team.

We look forward to hearing from you and working with you in the future.
