

MK93 MOD 2 & 4

The MK93 machine gun mount accepts the M2 series .50 caliber machine gun and the MK19 MOD3 40mm grenade launcher. This is a buffered mounting system and is commonly used in conjunction with the Universal Pintle Adapter (UPA), and Traverse and Elevation Mechanism (T&E). Adapters are also available to enable the MK93 to accept M240/M249 and M60 series weapons.

Material Options:	MOD 2 – 4130 Alloy Steel MOD 4 – 304 Stainless Steel
Finish:	MILSPEC powder coat or CARC
Ammunition Can Options:	<ul style="list-style-type: none"> • .50 caliber ammo can holder (100 & 250 round ammunition cans) • 40mm ammo can holder (Universal 32 & 48 round cans) • M60 ammo can adapter (200 rounds) • M240 ammo can adapter (200 rounds)
Shield Availability:	Ballistic Steel or Lightweight Composite

MK38 PEDESTAL MOUNT

Designed to accept all weapon mounts with a standard Navy or Army pintle, the MK38 can be used as a basis for the integration of a wide variety of weapon systems. Ideal for ECP, vehicle and maritime applications, this mount can be used with or without the exterior support legs, depending on application and weapon system.

Built to withstand the rigors of sustained maritime and ground vehicle operations, the MK38 is constructed to survive a wide spectrum of abuse.

The MK38 attaches directly onto a vessel, any suitable horizontal vehicle, or a land super-structure. May include a train stop attachment.

It can also be custom manufactured to your required height to support alternative mounting positions.

Weight:	75 lbs. (34 kg), approx.
Standard Height:	38" (96.5 cm), approx.
Material:	1020 Series Alloy Steel
Finish:	MILSPEC powder coat or CARC
Traverse:	360 degrees or set stops with attachment
Elevation/Depression:	+/- 80° (depending on application and mount system installed)
Weapon Compatibility:	M60, M240/MAG58, MK48, M249/MK46, M2HB/M2A1/M2A2, DShK, PKM and MK19 series machine guns and grenade launchers
Ready Use Ammunition Capacity:	Up to 500 rounds in large ammunition can configurations

MK38

M157 BUFFERLESS GUN MOUNT

The M157 is a bufferless gun mount and is for use with the M2HB/M2A1/M2A2 series .50 caliber machine guns, as well as the MK19 40mm grenade launcher. With optional adapters, the M60 series, M240 and M249 machine gun variants can also be used.

The M157 provides reduced weight and increased weapon reliability through a "bufferless" design, which mitigates mount-induced harmonic interference, given a recoil-operated weapon system.

Material Options:	4130 Alloy Steel or 304 Stainless Steel
Finish:	MILSPEC powder coat or CARC
Ammunition Can Options:	<ul style="list-style-type: none"> .50 caliber ammo can holder (100 & 250 round ammunition cans) 40mm ammo can holder (Universal 32 & 48 round cans) M60 ammo can adapter (200 rounds)
Shield Availability:	Ballistic Steel or Lightweight Composite

GUNNER SHIELDS

All mounts are available with integrated armor shields for protection to the weapon system and gunner. Various options include high hard steel armor, ultra high hard, lightweight composite armor, QCB compatibility, patented see-through variants, and custom sizes/configurations.

Includes shield brackets for attachment, which are engineered to sustain loading from dynamic mobile applications.

M157

MK97 MOD 0 GUN MOUNT ASSEMBLY

The MK97 machine gun mount accepts the M240 or M249 series machine guns. It can be installed on a standard MK16 MOD8 or MOD9 stand assemblies, MK38 fixed or adjustable mount, or various other vehicle, swing arm, and boat mounting sockets.

The ammunition can holder is integrated and holds NATO standard 200 round 7.62mm ammunition cans. Available with large/small pintle for use in all standard US Military/NATO pintle sockets.

Material Options:	4130 Alloy Steel or 304 Stainless Steel
Finish:	MILSPEC powder coat or CARC
Shield Availability:	Ballistic Steel or Lightweight Composite
