

Dynamic Trim Optimizer

- Customer challenge:** Vessels capable of adjusting trim during each voyage
- Potential solution:** Dynamic Trim Optimizer
- Potential fuel savings:** Average savings in the region of 1-3%
- Ideal for:** On-board crew

SUMMARY OVERVIEW

Enable your crew to maintain optimal vessel trim for fuel efficiency throughout a voyage in real time. This service reacts dynamically to changes in the weather/sea state and provides real-time, minute by minute advice on how to best trim the vessel

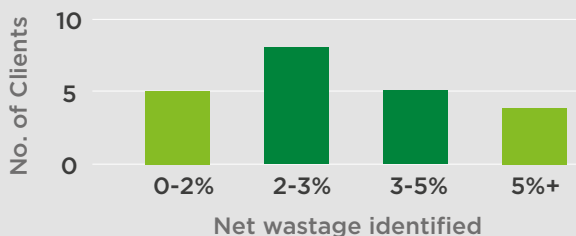

CUSTOMER BENEFITS

- Dynamically optimizing trim typically reduces fuel wastage by 1-3%
- Easy to use interface for crew use
- Up-to-the minute advice to reflect changes in operational factors
- KPIs capture trim recommended vs. trim set alongside trim fuel wastage

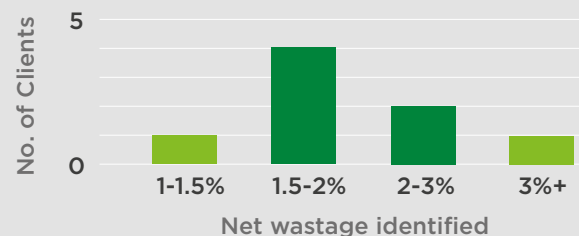

PRODUCT FEATURES

- Intuitive user interface and simple operation
- Machine Learning/Neural networks at the heart of accurate trim advice
- Provides relevant actionable advice to crew
- Allows optimization of vessel trim with real time advice for the super-optimized voyages

TRIM PLANNER

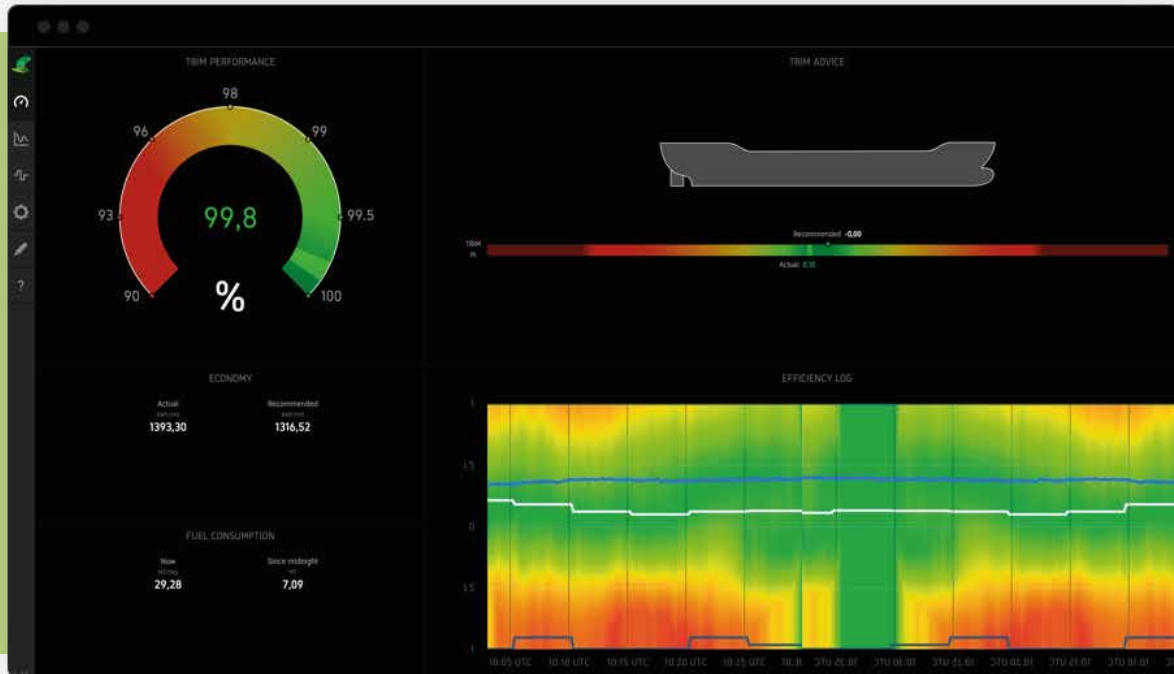

DYNAMIC TRIM OPTIMIZATION

N.B. The impact shown above is cumulative, Dynamic trim savings are in addition to the trim planner.
