

# Fouling Analyzer

- Customer challenge:** Monitor and predict the extent of hull fouling to assess impact on fuel costs and identify the best time to schedule cleaning
- Potential solution:** Fouling Analyzer
- Potential fuel savings:** Average wastage identified 5-10%
- Ideal for:** Owners, Technical Managers

## SUMMARY OVERVIEW

Bringing together our unique machine learning platform with your data, Fouling Analyzer provides you with the most accurate analysis of hull condition available.

All events and trends are shown clearly on graphs enabling you to make informed business decisions.

Fouling accounts for 60% of fuel wastage arising from poor vessel optimization.

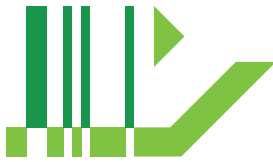

Fouling Analyzer provides insights to make better business decisions earlier.

### CUSTOMER BENEFITS

- Better management of hull fouling can reduce fuel wastage costs by up to 15%
- Understand actual status of vessel hull fouling & impact on performance
- Knowing when to schedule lay-ups for maximum benefit
- Evaluate efficiency of hull coating & cleaning events
- Being aware of catastrophic or unusual events
- Compare performance of different hull coatings

### PRODUCT FEATURES

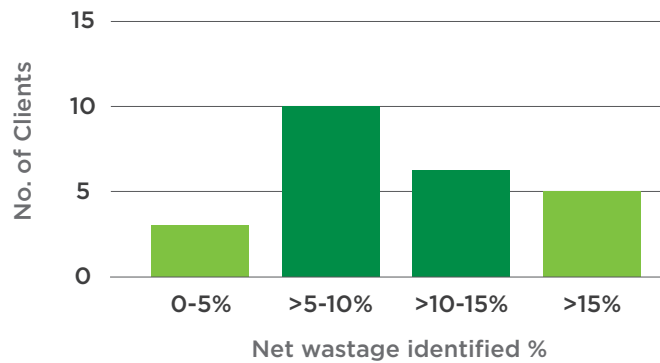

- Provides accurate view of key data related to fouling
- Tracks drop-off in performance due to hull fouling
- Measurable accuracy guaranteed by Machine Learning
- Enables optimization of hull cleaning schedule
