

Ideal for any building type, including retail shopping centers, adding an entrance canopy creates an inviting first impression. There are several different style options to complement any building's architecture. We have designed and installed cantilevered, overhead braced, and post supported entrance canopies. Other feature options include custom fascia and a sunshade as shown in the images below. Our team can assist in designing retail and storefront signage, or engineering our canopy to support signage. Functional, low-maintenance, and aesthetically pleasing - an entry canopy is a key element, maximizing your usable space and enhancing your entryway.

## The Difference

- One-on-one design & coordination
- Bidding, budget, & contract assistance
- Scope related coordination
- Real-time & on-site problem solving
- End client maintenance offered

## Application Types

- K-12 & Higher Education
- Commercial Buildings
- Entrances/Storefronts
- Healthcare Buildings
- Retail Centers

## Design Features

- Engineering
- Deck Options
- Fascia Options
- Variety of Finishes
- Internal Drainage
- Architectural Flexibility
- Welded End Plates & Water Stops
- Hidden Fastening Systems & Connections

### Components

All components are 6063-T6, 6005-T5, & 6061-T6 extruded aluminum alloy (except c-fascia & composite fascia).

### Finishes/Color

1. Anodized/Clear, Medium, Bronze, Dark Bronze, & Champagne
2. Polyester Baked Enamel (recommended for deck only)
3. Fluoropolymer 2-coat Kynar
