

1.**Keep downtime to a minimum**

System downtimes are expensive and can reduce revenues and damage reputation of the company. Zabbix Solution immediately reports about any malfunction within IT infrastructure as well as indicates the cause of the problem. It proactively informs about potential threats before they actually appear.

2.**Cut costs**

No costs associated with the purchase and management of licenses as software is free of charge. Better overall productivity and no lost opportunities with higher uptime of the infrastructure. Low investments in staff training due to simple and intuitive interface.

3.**Get a better control over your IT environment**

Measure, compare and get an inside view of your servers, network devices, UPS's, power supply, software and application performance. Agree on SLA (Service Level Agreement) with your IT staff and let Zabbix Solution monitor it.

4.**Choose a flexible solution to meet diverse needs**

Zabbix can be applied to a number of different markets and company specializations. Zabbix Solution use cases are not limited to one industry and can be adapted to very specific needs of any company.

5.**Access real time statistics and historical data easily**

Zabbix provides an excellent visualization of real-time statistics and historical data, ranging from simple graphs to complex views containing graphs, maps and text information. Use of this information helps companies to get an insight on their current and past performance and make logical predictions of the future. All graphical information is accessible from the web interface.

Seamlessly integrate in existing infrastructure

Zabbix integrates seamlessly with HP OpenView and Tivoli portfolio products including HP OpenView Service Desk and HP OpenView Network Node Manager. Zabbix provides high-performance agents for all UNIX, Windows and Novell platforms. SNMP support makes monitoring of all network devices and complex applications possible.

6.**Select from wide range of support options**

Zabbix has 5 support levels to match needs and requirements of any company. Support levels differ by the volume of provided support options, time of responsiveness, number of problem resolutions and by other optional/additional benefits that apply to higher levels of Zabbix commercial support.

7.**Make wise IT purchase decisions**

Find out and plan in advance which parts of your IT infrastructure require upgrades, improvements, resource re-allocation and tuning by simply taking a glance at reports and graphs available in Zabbix. Capacity planning with long-term graphs and trends is easy now.

8.**Perfect your skills and knowledge**

Discover all the power and advantages of the Zabbix Solution by attending Zabbix training courses organized in many parts of the world or by ordering training at your company site. Be sure to monitor your IT infrastructure in an efficient and secure way. Get in-depth knowledge of Zabbix in just 5 days.

9.**Align your future with a leader**

With over 30,000 copies downloaded each month, tens of thousands of registered forum members and above 1,000,000 unique new visitors per year, Zabbix is a secure choice for many years to come, thereby eliminating further costs associated with migrations and learning. Heavy investments are made in constant improvement of Zabbix Monitoring Solution. Ideas and suggestions submitted by our customers and users are taken into consideration when planning solution development roadmaps.
