CLOUD SERVICES

The cloud represents an epochal shift in how your business can leverage information technology to achieve optimal efficiency and performance. At Alternis IT, we're experts at designing and implementing cloud-based solutions and can help your business:

- Create a TCO Cost/Benefit Analysis to make a business case for cloud services.
- Procure the best cloud providers for your unique business needs.
- Transition your business from your existing legacy systems to your new cloud platform.

A SINGLE SOURCE SOLUTION PROVIDER FOR ALL YOUR CLOUD SERVICES NEEDS

Is the cloud right for your business? Which systems in your business belong in the cloud and which do not? Which providers should you invest in and how do you make the transition? These are all questions that Alternis IT can assist your IT and financial teams in evaluating and answering to provide an optimal experience.

WE HAVE CLOUD EXPERIENCE WITH THE FOLLOWING VERTICALS

Financial, Legal, Hospitality, Real Estate, SMB, Logistics, Medical, Enterprise, Retail, Healthcare, Insurance, Government, Education, and Software.

DISASTER RECOVERY AND CONTINUITY

The cloud helps vouchsafe your important data from hackers, cyber-terrorists, natural disasters, and manmade disasters. Consolidate your hardware infrastructure or become completely hardware independent with virtual disaster recovery and business continuity solutions.

UNIFIED COMMUNICATIONS & COLLABORATION

Allow on-site and remote users to collaborate seamlessly between devices and platforms with unified communications. With the right solution and implementation, VoIP, mobility, video-conferencing, instant messaging, bring-your-own device (BYOD), collaboration, and virtual presence technologies all work seamlessly together in the cloud.

INFRASTRUCTURE-AS-A-SERVICE (IAAS)

Reduce IT complexity, obsolescence, and costs by moving your IT infrastructure to a virtual environment. Virtualizing your co-location, disaster recovery, and storage infrastructure in public, private or hybrid clouds can make your organization more manageable, secure, and scalable at a much lower cost.

DESKTOP-AS-A-SERVICE (DAAS)

Fully embrace the burgeoning mobile workstyle by utilizing the cloud to access business applications and desktops on any device in any location. DaaS eliminates the need for software maintenance and makes purchasing and managing workstations elegantly and fast. No need to manage servers or hardware, and obsolescence becomes a thing of the past in the right DaaS ecosystem.

IT-AS-A-SERVICE (ITAAS)

Focus your time and budget on IT strategy by migrating your more tactical IT responsibilities to the cloud. ITaaS means your helpdesk, security, software updates, mobile device management, monitoring, and management can all be managed by trained specialists in the cloud. ITaaS reduces CapEx, puts transparency around your financials and ensures cash flow predictability.

IT-AS-A-SERVICE (ITAAS)

- Reduce spending on technology infrastructure
- Achieve greater economies of scale
- Enhance the globalization of your workforce
- Improve security
- Reduce CAPEX significantly
- Minimize software license requirements
- Increase flexibility and reactivity
- Reduce training and learning curves

WHY WORK WITH ALTERNIS IT

We know IT, we know the cloud, and most importantly, we know your business

We provide you a choice in choosing the best vendors

We're your single point of contact

We offer frank, honest considerations of your needs

We're invested in your long term success
