

## About Netnology

Netnology brings a proven approach to SDx and Cloud initiatives from years of industry experience in large scale multi-vendor networks. We help enterprise and service provider customers reduce time from concept to value through our services and software.

Our knowledgeable professional services teams help customers choose the optimum transformation path. Often the best path includes taking advantage of Netnology's SDx Innovation Labs and our hosted, automation and telemetry software solutions.

## Integration Services

Netnology SDx Innovation Labs (nSIL) is a fully integrated multi-vendor lab for cross-domain integrations.

## Hosted Services

Netnology Services Platform (nSP) supports Demos, PoVs, Training, and Production Deployments for SDx solutions across Data Center, WAN and Campus environments.

## Software Automation Services

Netnology Automation Platform (nAP) automates provisioning of network infrastructure and applications.

## Telemetry Services

Netnology Telemetry Platform (nTP) provides realtime visibility across SDx domains.

## Professional Services

Our technology practices include SDNFV, Cloud, Data Center, Automation, Analytics and Security. Within these domains we provide training and enablement, life-cycle and advisory services.
