# Introduction

Oracle Cloud application setups / configurations are complex. For the past over Five years, Oracle Cloud customers have taken advantage of our dataZap Platform to automate Setup migrations across Oracle Cloud instances and even from EBS releases to Oracle Cloud Applications. **ChainSys proudly offers a complete innovative templated approach for migrating Setups for Oracle Cloud applications.** Using our Platform, our customers can migrate setups across Oracle Cloud Instances and also, we offer ready to use setup migration mappings from Excel Spreadsheets to Oracle Cloud applications.

## Value Propositions

Time Savings	Cost Savings	Improved quality in master data
Improved Project efficiency	Improved Release Mgmt. for Configs	Improved Project Team Morale

## Use Cases

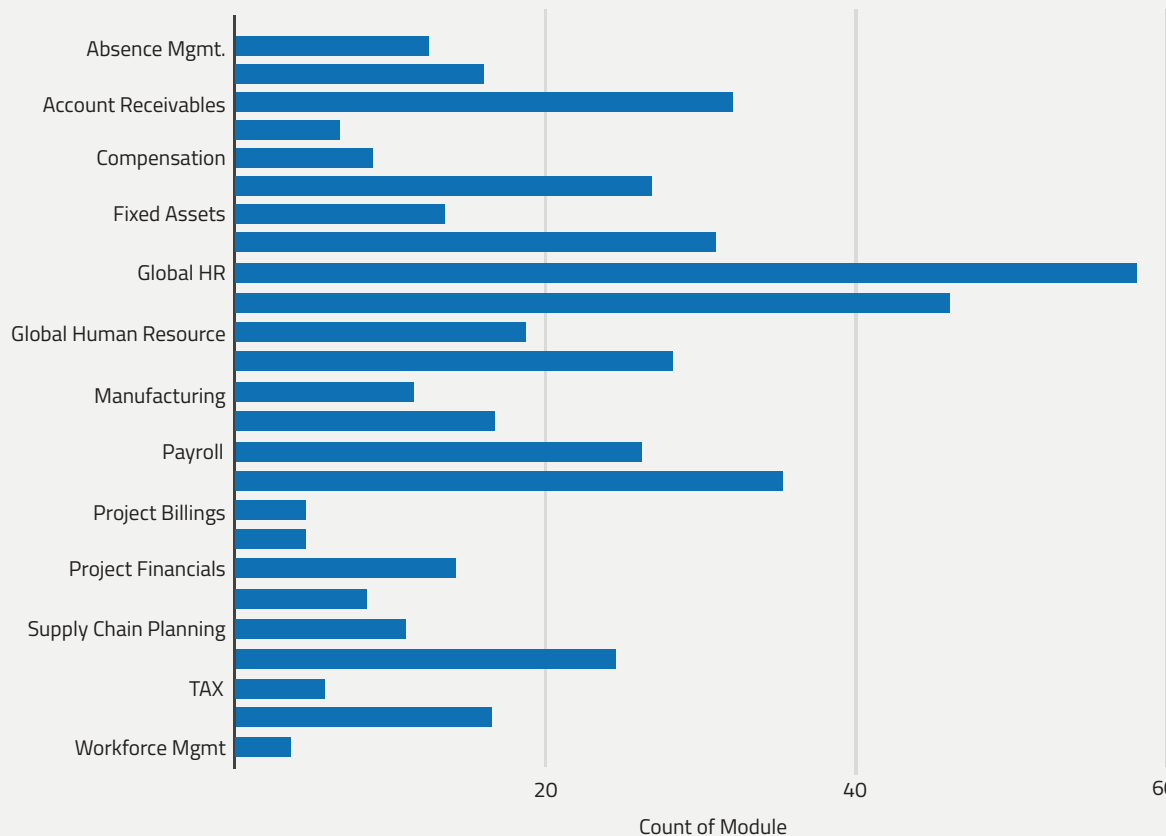

- Migrate Configurations from Oracle Cloud to Oracle Cloud application
- Create new Legal entity, Operating Unit, Inventory Organization setups from existing setups in Oracle Cloud application
- Create the first-time configurations in Oracle Cloud Applications - Standard Configurations available
- Migrate configurations from existing On-premise EBS to Oracle Cloud applications.
- Report the configurations existing in the Oracle Cloud applications
- Report the differences in configurations between Operating units or legal entities or inventory organization within or across Oracle Cloud instances
- Create an auditable release Mgmt. process for Configurations in Oracle Cloud applications
- Accelerate Configurations in Oracle Cloud applications for Merger and acquisitions / Divestitures / Carve outs
- Accelerate Configurations in Oracle Cloud applications for Instance consolidations
- Compare setups across Oracle Cloud Applications and incremental setups can be migrated from source to target and vice versa.
- Reporting for Setups – Flexible layouts and formats available for your dynamic view of setups.

## Conclusion

There is great value in automating your Setup migrations for Oracle Cloud ERP Applications using dataZap. The Platform is used during the Implementation/Rollouts of the Oracle Cloud Applications and also for monthly release Mgmt. of Setups. Also, the Platform eliminates the need for creating manual configuration document (Br100) and helps with identifying the mismatch in configurations.

This is a great Oracle certified solution for Oracle Cloud Application releases.
