Our Story

Through our technology vision and leadership defining the industry's first 'Know Your Customer' solution for communications, Numeracle is returning trust and transparency to calls, messages, and more, so businesses can continue to communicate with their patients, members, prospects, and customers.

Starting with actionable measures to improve call presentation and delivery, we've enabled 200+ legal entities to prevent improper call blocking and Fraud labeling. By continuing to work with technology providers, carriers like Verizon, Sprint, AT&T, and T-Mobile, analytics companies, and others, we are able to provide visibility and control across the major stakeholders who have an effect on the way your communications are presented to consumers to help you protect the delivery of your brand identity.

Our Advocacy

As the pioneer of Entity Identity Management™ for communications, Numeracle provides industry leadership on the IP-NNI Task Force (co-authors of SHAKEN), USTelecom Working Group, the Hospital Robocall Protection Group, and as Chair of the Enterprise Communications Advocacy Coalition. We also participate in numerous industry associations such as the iA Consumer Relations Consortium, ARDA, American Bankers Association, and ACA International.
