NEWS Release

Parsifal Introduces ecolegIT A Technology for Relocation CO2 Offset

Fairfield, ME, (May 4, 2022) – [Parsifal Corporation](#) announced today a collaboration with ecolegIT, a unique and simple technology solution for corporate customers and suppliers – offering a full carbon emission offset compensation for individual moves.

Parsifal validates reported carbon offsets and related payments utilizing the Parsifal EcoAudit™. Mark Olsen, President and CEO, explains that “compensation is traced back to its source (the carbon credits gained from a carefully maintained sustainable forestry project), ensuring the amount of project credits gained equal the amount of credits necessary to compensate for the CO2 emission of the participants’ shipments.”

ecolegIT offsets carbon emissions through selected sustainable forestry projects that also contribute to local social and environmental goals. Utilizing a flat fee per shipment approach, ecolegIT offers participants a clear and standardized cost structure. ecolegIT ensures a transparent and hassle-free carbon footprint reduction program with the use of a unique algorithm technology while converting the actual move input into a validated CO2 emission footprint. A compensation offset engine provides a visual online operation of each client’s actual carbon offset compensation, conveniently allowing a large volume of shipments to be simultaneously processed.

Parsifal is the world's leading audit, technology and consulting firm providing relocation auditing services and procurement technology, touching moves in over 120 countries around the globe. Our services and products are in worldwide operation with corporations, carriers and move managers in Africa, the Americas, Asia, Australia and Europe.
