Company description

Alicorn is a professional **IT** company providing customers with technical and creative web services. They see clients as partners and are ready to take care of every aspect of their digital presence – from developing go-to market strategies to implementing metrics & analytics solutions.

Your primary tasks would be to:

During your internship as a Front-end developer, you would have a variety of tasks and learning opportunities in Alicorn. These would range from site maintenance to building simpler web sites and web apps. The Alicorn team is very much interested in advancement of its team members as such our junior developers can expect to get both in house and external trainings and courses.
