

Level 7

# MA in Education

The MA in Education develops teaching expertise through evidence-based research and promotes the scholarship required to reflect deeply and improve the participant's own professional practice and that of others.

## Modules

1

30 Credits - Bridging Unit

### Transformative Practice

In this module learners will reflect on their development through critical evaluation of key documents relating to their professional learning to date as well as the effectiveness of target setting.

3

### Principles of Educational Research - research methods and project design

30 Credits

Students will explore a range of research and inquiry methodologies as well ethics and reflect on appropriate research methods to present a project proposal.

### Optional Modules

Optional Modules will deliver the latest research findings in key contemporary areas of education, providing learners with research ideas for their Master's and a deep understanding of these fields.

- Optional Modules include:
- Neuroscience, psychology and learning
- Curriculum research and design
- Delivering formative assessment

## Features & Benefits

## What people think

"Trainers use an interactive approach to teaching, which encourages questions from apprentices and so generates open discussions."

Ofsted Report 2019

"Another inspiring day of learning @TheNCE... What an amazing experience it's been so far...and the journey has only just begun! So excited to be part of this programme."

 @Roxschminkle
