

# Science of Learning Programme

This programme develops teaching expertise through evidence-based research and promotes the scholarship required to reflect deeply and improve the participants own professional practice, and that of others.

## Features:

- ✓ 12-month blended learning Masters that can fit around your work commitments
- ✓ A dedicated Tutor to support you throughout the programme
- ✓ Develop your teaching expertise through evidence-based research
- ✓ Build your own scholarship during this affordable one-year programme
- ✓ Complete a whole-school research project and publish a dissertation
- ✓ 5 seminar days to inspire you and support you in achieving your MA (including topics such as neuroscience, curriculum, assessment)

## Modules

### Research Methods and Masters Writing

Delivered by the NCE Academic Team, this introduction to research and essay writing will support you through the research elements of your study.

### Neuroscience and Psychology of Learning

Delivered by leading experts in the field and covering key elements of the science of learning including instructional coaching, retrieval practice and dual coding, and cognitive load theory.

### Assessment

An overview of the current assessment landscape in light of Covid-19; exploring alternative methods of assessment and those that have most impact on student performance.

### Curriculum

Provides a deep dive into curriculum research and design, including modules covering online learning for the whole class and intervention.

### Literature Review - Contemporary Issues in Education

Research project looking at contemporary issues in education and synthesizing relevant literature that will inform the research project.

*"The Science of Learning Masters sets the bar for all those interested in teaching and supporting those that teach."*

Vivienne Porritt, WomenEd
