Quality Wardrobes and Doors

How to Measure
Guide

Whether you are adding a wardrobe as part of a renovation or replacing an existing system, the first step is to come into our showroom for an appointment with your design consultant.

To make the best use of your time together, we recommend you bring approximate measurements of your space, together with a few photos on your phone. That way, we can get a design and quote underway immediately.

Your designer will then come to your home to complete a final measure and finalise any details.

How to measure door openings

1. Height left side
2. Height centre
3. Height right side
4. Top width between door jambs
5. Centre width between door jambs
6. Bottom width between door jambs
7. Width of door jamb

Take note of what floor surface have you measured from – carpet, ceramic tiles, vinyl, cork, bare wood or concrete floor? If you have measured from a bare wood or concrete floor, are you planning to fit carpet or some other type of floor covering?

Front view of door opening

Top view of door jamb

How to measure space for wardrobe interior (organisers)

1. Left-hand return width
2. Internal depth
3. Internal back wall length
4. Right-hand return width
5. Height of door opening
6. Height of ceiling

Things to Look Out for:

- Power Points & Lights - take note of positions and size
- Windows, hatches, architraves, sills, curtain rails etc.

Boston Wardrobes
offers the largest
range of wardrobe
systems in
New Zealand.

Our showroom has many reach-in and walk-in wardrobes on display, showcasing all of our organiser and door ranges, as well as accessories.

Depending on your requirements, building stage and budget, our sales consultants can direct you to the system that will best suit your project.
