

# TWELVE STONES GOLF CLUB NEWSLETTER

MARCH 2022

## On The Calendar

**March 7-8** Aerification: Course Closed

**April 1** Master's Par 3 Contest

## Why do we Aerate?

The root system of any plant is the lifeline which pumps those precious nutrients required for its sustainability. Simply put: healthy roots equals a healthy canopy (mostly). With golf putting greens, the soil below the surface becomes expended of nutrients and more compacted over time, which restricts root growth and limits the overall health of each plant. By removing plugs of old soil and replacing those voids with fine white sand, each root system can grow and spread more efficiently, ultimately creating a lush putting surface that is maintainable in consistency and quality. We as golfers share your frustration of bumpy, inconsistent putts which

must be endured for weeks to follow typical aerated greens; however, using DryJect's high-pressure, water-based injection system, the scars are barely noticeable within days, not weeks. The DryJect system has replaced the laborious and intrusive core-extraction process by blasting sand and water simultaneously into the soil, while achieving better results in half the time. So don't fear! Give us a few days to groom our greens back to happiness and perfection. We promise you will not be disappointed!

## Master's Par 3 Contest

On Friday, April 1, 2022, we are proudly hosting our 2nd Annual Master's Par 3 Tournament. With our upmost respect to The Master's at Augusta National, we wish to invite you to compete in our 9-hole, individual play golf tournament to compete for our coveted green jacket. Won by Chris Batson in 2021, this competition is formatted to the exact yardage of the true Master's Par 3 Contest. Registration is open to members and the public, and spots are filling up fast!

## The Learning Center

One of greatest additions to growing the game of golf, The Learning Center at TSGC has amped up it's inventory, and is stocked with the latest and greatest Taylor-made technology that is hot on the market. Our talented team of golf professionals are some of the best in the business; and are fully capable of building you a golf swing, as well as a custom fitting experience to put the best hardware in your hands. Whether you're wanting to fine-tune distance control or generate swing data in a climate controlled environment, we guarantee a tour experience and real improvement in your game.
