

Copperstate Farms Opens Second Sol Flower Dispensary

The Sol Flower Flagship in Sun City Features a Mixed-Use Café and Educational Space Open to the Public

SUN CITY, Ariz. ([PRWEB](#)) August 14, 2019 -- Copperstate Farms Management, LLC, a vertically integrated cannabis company, today announced the opening of its second Sol Flower dispensary at the corner of 99th Avenue and W. Thunderbird Boulevard, 13650 N. 99th Avenue, in Sun City.

Sol Flower is dedicated to building an inclusive cannabis community by offering diverse resources for the canna-curious and medical cannabis patients. With a mission to empower wellness for all, Sol Flower encourages the community to live life to the fullest and live life with sol.

Open every day, the mixed-use dispensary complex is the first-of-its-kind in Arizona to have an adjoining café and classroom accessible to the public. This is Sol Flower's second location in the Valley, the company opened their Tempe dispensary in July.

Sol Flower offers educational courses for the general public covering a full spectrum of healthcare topics at its multi-purpose classroom. A hub for mindful communication and knowledge cultivation, class curriculum includes cannabis 101, medical cannabis for senior health, a guide to essential oils, and more. Additional classes will focus on mental, physical, and spiritual rejuvenation, such as yoga, demystifying meditation, cooking with CBD, and mindfulness training.

“The Sol Flower vision is to empower wellness for all,” stated Director of Patient Services, Jane Fix, who will lead the curriculum. “At our Sun City location, residents can access resources on healthcare alternatives, interact with medical cannabis experts, and participate in physical activities such as yoga, meditation, and even cooking with CBD classes.”

The adjoining reception area and café is an additional social gathering space where patients and the general public can purchase premium coffee and espresso from Press Coffee Roasters and non-medicated food items.

The café breakfast menu is available until 3 p.m. and includes a spicy Devil's Mess Breakfast Burrito, fresh fruit Smoothie Bowl, assorted baked goods, and other savory options. A healthy selection of bistro items rounds-out the all-day lunch menu, including an Eat the Rainbow salad, Curry Chicken Salad sandwich, Lentil Curry Coconut soup, and Mezze hummus bowl.

Designed to serve Arizona's diverse demographics, Sol Flower showcases a thoughtfully curated product mix. Medical cannabis patients will have access to craft flower, premium concentrates, full-flavored edibles, industry-leading vape pens and cartridges, and high-performance tinctures and topicals. Featured brands include award-winning Moxie Concentrates, Item 9 Labs, and Good Things Coming.

Intended to reshape the perceptions of cannabis, the dispensary is partitioned with seamless, floor-to-ceiling glass walls, allowing the general public to enjoy the café and classroom. Collectively, the complex shares a mid-century design aesthetic with reclaimed wood accents and a spacious lounge area spanning throughout the establishment.

“We created an interactive environment for patients and the community. The glass walls function as windows into the dispensary, reflecting our commitment to inclusivity, transparency, and connectedness,” stated Pankaj Talwar, President and COO of Copperstate Farms.
