Project Code: FGEN0002 – Men's sample
Project Name: Omnibus June 2022
Prepared for: Tyler Drozd
Interviews: 2000
Field Period: July 11, 2022 – July 15, 2022
Project Manager: Nour Abboud Frank, nour.abboud@yougov.com

=====

YouGov interviewed 2054 men who were then matched down to a sample of 2000 to produce the final dataset. The respondents were matched to a sampling frame on age, race, and education. The frame was constructed by stratified sampling from the full 2019 American Community Survey (ACS) 1-year sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on a three-way stratification of age (4-categories), race (4-categories), and education (4-categories) to produce the final weight.

Variable List

=====

caseid	Case ID
weight	Gen Pop Weight
q1	Circumcised
q2	Consider procedure to reverse circumcision
birthyr	Birth Year
gender	Gender
race	Race
educ	Education
marstat	Marital Status
faminc_new	Family income
pid3	3 point Party ID
inputstate	State of Residence
starttime	Questionnaire Start Time
endtime	Questionnaire End Time
