

THERMOSTAT CONTROLLED ECONOMIZER FAULT DETECTION & DIAGNOSTICS

A stand-alone Title 24 solution

- California Energy Commission approved and listed
- FDD faults displayed locally at thermostat
- Compatible with a typical AC or HP unit
Note: Standard electro/mechanical terminal block on unit required
- BACnet protocol compliant
- Capabilities include:
 - Automated Demand Response (ADR)
 - Occupancy sensor ventilation control
 - Lighting control
 - Receptacle circuit control
 - Exhaust fan control
 - Pump control
 - Door & window position monitoring for unit setback
 - Customizable to a specific application

Complete room control is now managed from the unit's intuitive built-in display. This user friendly thermostat platform offers a unique Title 24 solution that is capable of much more than temperature control.

Contact our sales department for your FDD solution.
