

# RAISING THE STANDARD

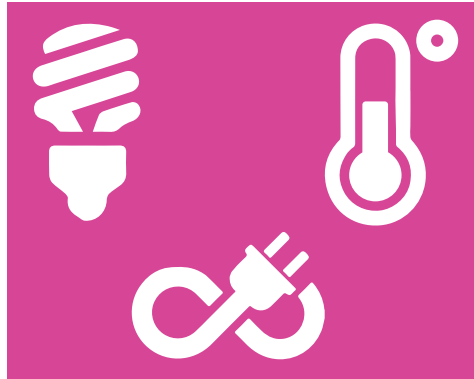

# Education Meets Comfort & Efficiency

## Advance Energy Management Solutions by L&H Airco

Tackle the demands of a school campus from a centralized control system and help increase average daily attendance.

- SINGLE PLATFORM
- IT SECURITY
- CENTRALIZED MONITORING
- SYSTEMS INTEGRATION
- COMMON NETWORK

- AIR PURIFICATION
- AIR QUALITY MONITORING
- HEALTHY LEARNING ENVIRONMENT
- REDUCE VIRUSES AND BACTERIA

- ADVANCED LIGHTING CONTROL
- TEMPERATURE CONTROL
- PLUG LOAD MANAGEMENT
- ENERGY METERING
- MEASUREMENT AND VERIFICATION

- ENERGY CONSERVATION
- DYNAMIC LOAD MANAGEMENT
- REDUCE CARBON FOOTPRINT
- UTILITY INCENTIVES
- ENERGY ANALYTICS

Elevate your Energy Management System (EMS) to the next level by combining temperature control, lighting control, plug load management, and utility monitoring into a single platform. Our seamless integrations will help your new construction and retrofit projects be successful. An inclusive EMS allows your operators the ability to maximize their most important resource, time.

L&H Airco offers a complete energy management system that gives you the ability to monitor and control your campus for optimum efficiency, comfort, and health. Air purification will create a healthy learning environment for faculty, staff, and students; ultimately raising your general purpose funds as the average daily attendance increases.

Our scalable solutions will ensure that as your school district grows, your controls system will grow together to suit your needs.
