

SMOKE SEASON

WILD FIRES ARE A WAY OF LIFE IN CALIFORNIA AND WITH THEM COMES SMOKE. DON'T LET THAT SMOKE INTO YOUR OFFICE OR CLASSROOM.

EMERGENCY ECONOMIZER OVERRIDE

The outside air may not always be fresh and safe. There could be smoke or other contaminants in the air. If so, you'll want to close those dampers fast. L&H Airco recognized this need and developed the Emergency Economizer Override program. This program provides a single location for the user to quickly override all economizers at a building or site.

- One location adjustment for all Alerton-controlled economizers
- Select any damper position - default setting: Fully Closed
- Override indication banner on each screen
- Override requires documenting the time and user making the change

ADDITIONAL ENHANCEMENTS

L&H Airco has created many Alerton control system enhancements to assist our customers in operating their facilities with tenant comfort, safety, and energy savings in mind. We offer these additional enhancements to allow owners and facility managers more flexibility in the operation of their systems.

- Outdoor Particle Sensors (PM 2.5 or PM 10) for Automatic Economizer Override
- HVAC Unit Economizer Retrofits
- Secure Aire Air Purification Systems
