

LAND Betterment

Land Betterment Corporation fosters positive social and environmental impact by up-cycling former coal mining sites to create sustainable community development and job creation. In the impacted communities we are witnessing a moment of change as our society transitions away from coal-based fuels.

We develop and implement real world solutions to real world problems.

Central Appalachia and the rust belt has been decimated by the emergence of energy independent from low cost natural gas.

Drastic shifts have resulted in a massive amount of unused infrastructure and property that can be utilized for economic and environmental progress for the good of the local community.

We can **Repair the Earth** while also utilizing the land for new community development opportunities.

Job Opportunities are an essential element to a healthy community. Healthy communities also help keep the earth clean and safe.

Our business utilizes the **Skill Set, Talent, and Desire** of the local community.

We have the **Experience, Knowledge, and Resources** to execute a new vision for the area.

Our team has developed a **Passion and Network** to bring new jobs opportunities to a region that used to be one-dimensional.

Reclaim Land Repurpose Land

"Land Betterment is committed to restoring the impacted land from prior coal mining and industrial sites and bettering the land into areas that the local communities can be proud of, while generating employment and reinvigorating the region."

**KRISTIE SLONE
TEAM LEADER**

Land Betterment Brands

We are bringing real opportunities to the community that the people truly want.

Simple solutions utilizing the deep skill sets of the region's population
