Hi, I'm Bram. I'm a UI/UX Designer with a background in branding and a passion for good type.

While getting my bachelor in Interactive Multimedia & Webdesign at Thomas More Mechelen I've worked for different clients creating websites, logos, brand guidelines and illustrations. Because of this, my basic knowledge of front-end code helps me communicate with developers and understand all aspects of the design process.

The last few years I've gained experience in UI/UX by working on apps & websites for companies like: KBC, Belfius, DVV, TUI, Transavia, Renault, Dacia. After one and a half year working on a new design system as a consultant at KBC I am ready to tackle new things.

I've dabbled in marketing, advertising & entrepreneurship through creating my own clothing brand with hand-drawn type and imagery. Although I discontinued the brand, I'm still learning as much as possible about all different fields and looking for new opportunities.

Want to know more about me? Take a look at the next page!
