

## User Interface Designer

We are looking for an individual with a keen eye for detail to join our Design team. UI Designers are primarily tasked with crafting effective products with elegance and detail, while always considering the user experience. This role requires a multidisciplinary design background, including but not limited to: experience with branding, UX/UI experience, and visual design. Collaborating with fellow designers, product managers, and developers is key to the success for a UI Designer at Infuse.

The User Interface Designer role can be broken down into the following responsibilities:

### Key Responsibilities:

- Work with product managers to understand requirements and user flows.
- Research competitive comparisons and gauge market trends.
- Create wireframes and validate product features.
- Iterate on designs based on client feedback.
- Craft user interfaces and interactions for multiple digital platforms.
- Produce powerful branding to fit each product's visual language.
- Work closely with developers to implement designs.
- Share your designs and explain the rationale behind your work.
- Accept feedback from others and translate them into actionable ideas.
- Collaborate with the design team on various design tasks.

### Qualifications:

- 2+ years of experience as a visual / UX designer.
- Proficient in current design practices and production software such as Figma, Sketch and Photoshop.
- Experience being part of a team that has built and supported products from concept to launch.
- Experience creating branding elements and style guides.
- Proficient in creating wireframes and hi-fidelity mockups.
- Experience working with multiple feedback cycles and iterations of a single product.
- Familiar with iOS, Android, web and various other digital platforms.
- Experience working with developers and presenting your designs to the team.
