

Whatever the profile of the people to be tested, ELAO offers a rapid, economical and efficient solution.

EFFICIENCY

The questions are neither too difficult nor too easy. The system analyses responses and adapts in real time to the level of the person tested, giving the person a sense of achievement and allowing a reduction in test duration to around thirty minutes.

EASE OF USE

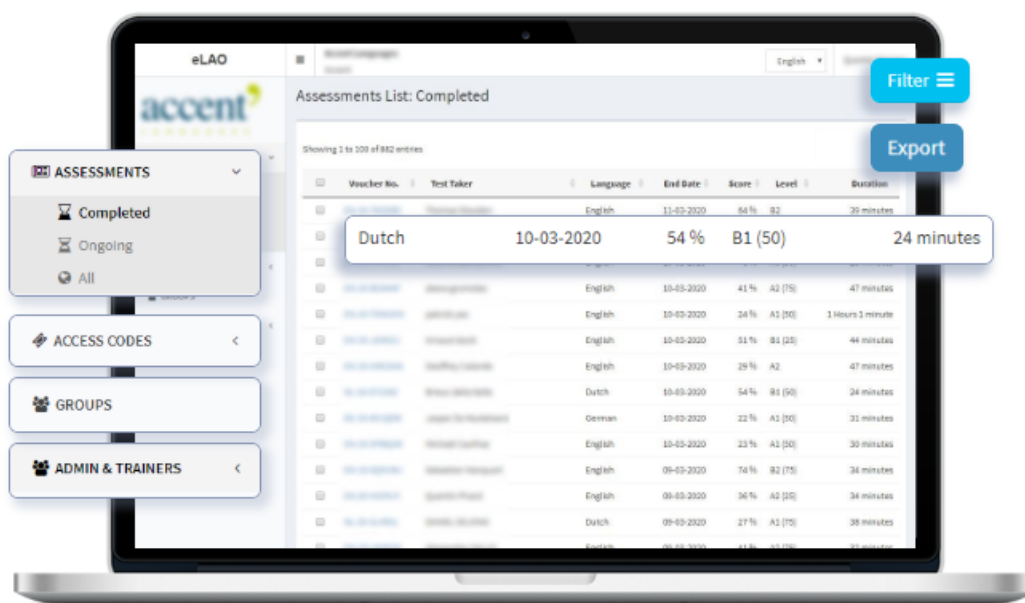

ELAO is easy to use both for your participants and the administrator. It enables easy management of substantial assessment projects. As a flexible platform, it smoothly integrates with your skills-assessment processes.

ACCURACY

ELAO uses adaptive mechanisms which provide accuracy to within a quarter of a level, and a reliable assessment of the person's oral level. Statistical studies carried out with our clients demonstrate 87% reliability. This data has been drawn from 20,000 evaluations with a maximum quarter level gap tolerated between the oral level and the ELAO level.

CEFRL

ELAO is based on the Common European Framework of Reference for Languages (CEFRL). The use of this scale facilitates communication and identification of the levels obtained.

EVALUATION CHARACTERISTICS

Languages tested

- English
- Spanish
- French
- Italian
- German
- Dutch

Interface language

- English
- Spanish
- French
- Italian
- German
- Dutch

Skills evaluated

- Grammatical structures
