Cloud Foundation

Reduce costs, Improve Security, Save time

Simplify Cloud Management

AWS offers many benefits such as scalability, better security, and lower costs. However, it brings new operational challenges too. Without a deliberate approach to architecting in the cloud and mature governance practices, organizations are finding themselves exposed and spending more than originally planned. Cloud management solutions, such as Cloud Foundation, can reduce complexity and help organizations be more efficient and secure in the cloud.

Maximize Your Investment

Cloud Foundation delivers a combination of certified experts, tooling, and proven methods to give you greater visibility and control over your AWS environment - no more unexpected bills, unused resources, or major security gaps.

Additional Savings

We have helped customers achieve a net reduction in monthly AWS billing by over 35% by identifying unused resources, finding better pricing options, and improving governance.

Greater Visibility

We give you access to the leading Cloud Management Platform (CMP) and Mission resources so you can have more visibility into the activities that are important to you.

Less Risk Exposure

Security and compliance are top concerns. We help you maintain common AWS account security standards and alert you to issues that require your attention.
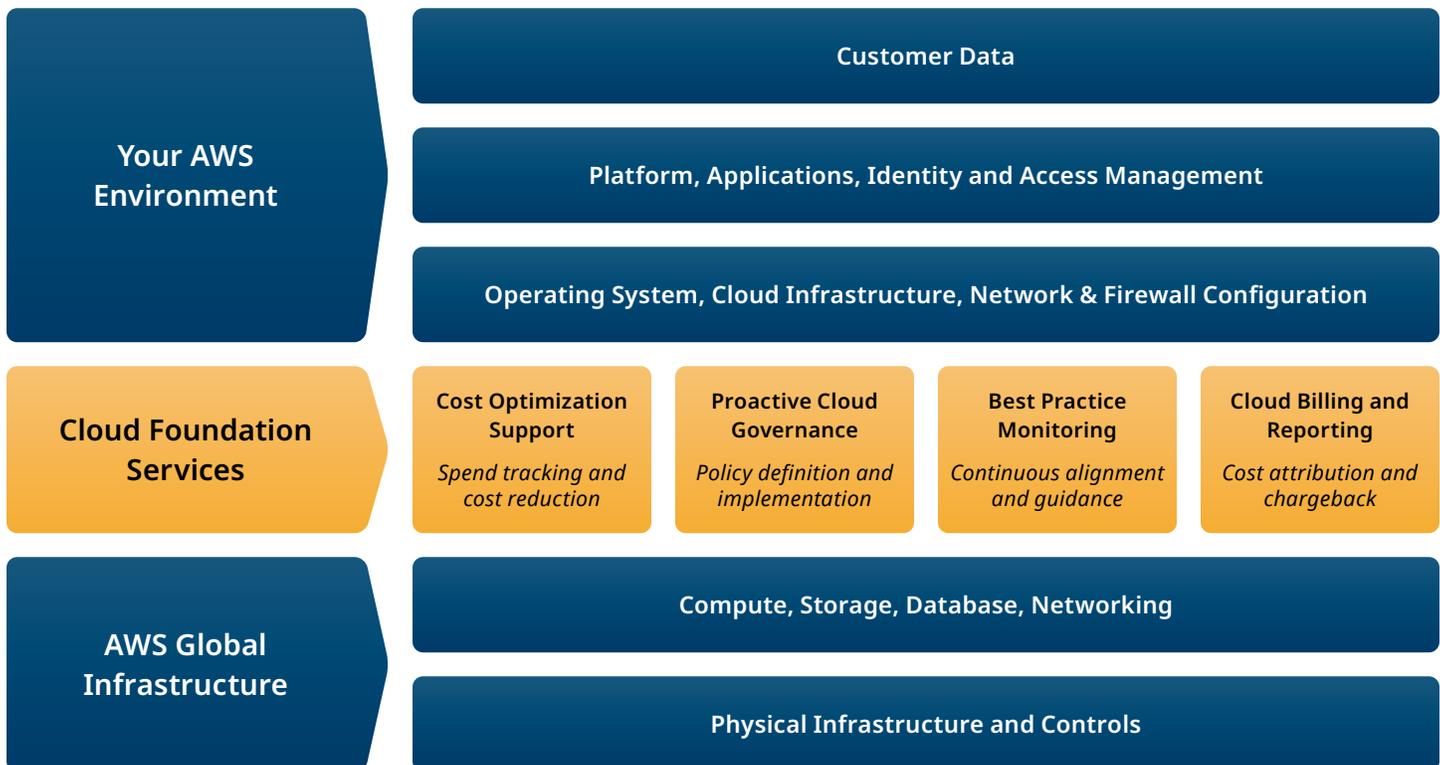

Continuous Engagement

We regularly monitor and advise on your cloud costs, usage, and other aspects of your environment, and stay highly engaged throughout your cloud journey.

Build on solid ground. Benefit from healthy cloud consumption.

Cloud Foundation Services

Cloud Foundation adds a non-disruptive cloud optimization and governance layer to your environment that promotes healthy cloud consumption as you grow and operate your AWS environment.

Your AWS Environment

Customer Data
Platform, Applications, Identity and Access Management
Operating System, Cloud Infrastructure, Network & Firewall Configuration
