**Typical Tree Planting Detail**

**NOTES:**

1. Wearing in of trees shall be completed on the same day as planting and be sufficient to consolidate the backfill around the roots.
2. Location of services to be checked prior to excavation.

- 4 Nos 90 x 90mm treated pine posts and cross of chain to avoid damage to roadball. Rails to be 70 x 30mm treated plain. Tree guard to be vertical, square, level and a minimum of 1200mm above ground. 2 Nos continuous ties to be secured around trunk and securely stapled to tree guard to allow some trunk movement. Tie to be set at maximum 1.5m of height of the tree at planting. All timbers painted with 2 coats black/white primer.

- Tree collar to be in accordance with City of Greater Bendigo requirements. Pop of roadball to be flush with finished level of the planting hole.

- Raised 75mm high berms (yin of soil) to form a watering basin and direct water into roadball. 75mm depth approved hardwood mulch to be kept clear of tram.

- Soil overlapping and substandard soil to prevent settling.

- Excavate sloping shallow planting hole minimum 3 times the width of the roadball and break-up sides. Depth of planting hole no deeper than the height of the root ball. Backfill hole site should be broken-up to facilitate terracing. Apply fertilizer.

**Tree Planting Detail (nts).**

- Back of kerb.
- Street tree.
- Timber tree guard as detailed above - setout to be 90° to kerb line.
- Foopath.
