

FLOATING CUBES : SUNNYDOCK

A FOOLPROOF FLEXIBILITY

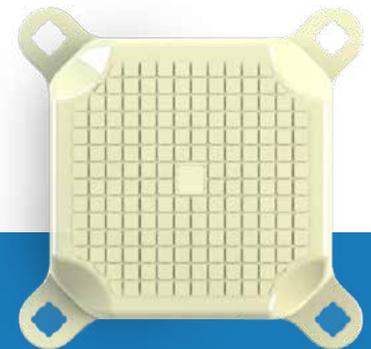

A MODULAR DOCK MADE OF SUNNYDOCK FLOATING CUBES IS VERY FLEXIBLE AND ROBUST AT THE SAME TIME. YOU CAN CUSTOMIZE IT VERY EASILY WITH A WIDE RANGE OF ACCESSORIES, GANGWAYS AND RAILINGS.

Modular floating cubes are made of **high density polyethylene**. They are blow molded.

They come in three models: **single cube, double cube, double cube with low freeboard**.

	Dimensions	Weight	Flotation	# Part
A.	50cm x 50cm x 40cm	6.5 kg	87.5 kg	SDS-01010
B.	50cm x 100cm x 40cm	11.0kg	175.5 kg	SDS-01040
C.	50cm x 100cm x 25cm	9.5kg	110.0 kg	SDS-01050

With a load capacity of **87,5kg per cube** (model A), this solution also offers exceptional buoyancy of **350kg/ m²** which value may be multiplied by 2 or 3 by stacking layers of cubes.

In addition, total modularity allows it to adapt to **all sites for all projects**, but also to **all budgets**. If this criterion is essential in the development of your project, our double cubes and double cubes with low freeboard will grab your attention.

➔ TOTAL MODULARITY

The extreme simplicity of the design of the modular floating cube facilitates the adaptation of various types of **anchoring** and standard accessories as **mooring cleats, fenders, guardrails, ladders**, etc.

➔ EASE OF ASSEMBLY

The assembly of modular floating cubes is extremely simple. Each SunnyDock cube has **4 ears on each angle** which enable assembly by the **connecting pins** tightened by means of a **locking key**.

➔ MAXIMUM FLEXIBILITY

This foolproof flexibility is undeniably the **great strength of these pontoons** that can be installed in the **open sea** or **any other body of water** exposed to **difficult conditions**.

SECTORS OF ACTIVITY

The modularity of our SunnyDock floating cubes allows them to adapt to various water bodies in many sectors of activity : **water sports, maintenance works, floating pool** and **bathing platform, tourism** and **event applications**, etc. Whatever your project, you can trust the versatility of our sections to meet your most precise needs.

Water sports

Floating pool

Maintenance works

ANCHORING

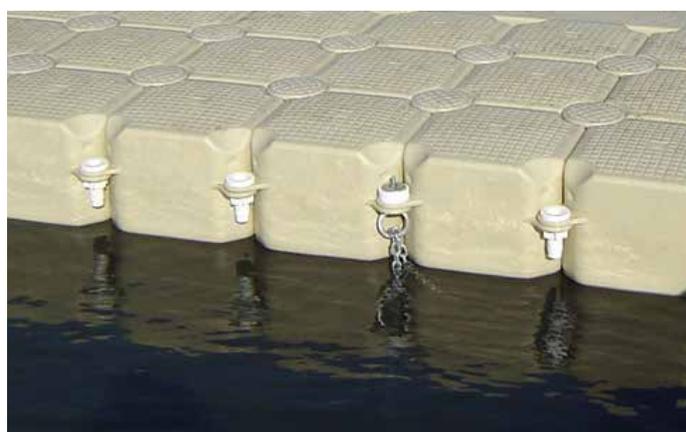

Our pontoon sections can be anchored in different ways. In all cases, the type and number of anchors will be determined by the constraints of the size of the pontoon, the type of body of water (sea, river, lake), the environment in which it will be located (port, beach, arm of river, closed basin, etc.), the type of boat it will welcome, machine it will have to support, current and winds it will have to resist, etc.

For each type of anchor, we have developed specific accessories ensuring greater efficiency.

To the shore or wharf

By chain or rope on mooring rings

Heavy-duty stiff-arm

Steel plate

Anchoring on rope

Anchor ring

GANGWAYS AND RAILINGS

SD-1705-EN

We provide 2 ranges of gangways : polyethylene or aluminum. As an addition to our floating cubes, we propose aluminum and polyethylene railings, simply posts or complete railings in different widths.

Aluminum gangways

Gangway connection to shore

Polyethylene gangways

Gangway connection to dock

Wheels system for gangway

Railings

Polyethylene railings

ACCESSORIES

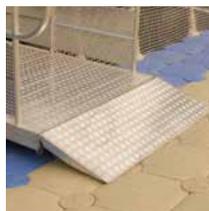

The unique design of our floating cubes can integrate a range of accessories to customize your dock to suit your needs. Indeed, thanks to coupler pockets every 50cm on 4 sides of each section, the consolidation of these accessories at the dock is a breeze.

Polyethylene cleat

Galvanized steel cleat

Transition plate

Adaptor cubes-dock sections

Swim ladder-polyethylene

Retractable bathing scale

Bumper set

Support piles for canvas cover

Coupler key

Coupler set
