

THE WORLD HAS CHANGED

we can help you define your AI strategy that will add value to your business

Leading organizations expect to double the number of Artificial Intelligence (AI) projects in place within the next year

over 40%

of them plan to deploy AI solutions by the end of 2020. *

The use of AI has become the biggest commercial opportunity for companies everywhere.

- Do you know what this means for your organisation?
- Do you know where to start?

At Fountech.Solutions, we live and breathe AI.

We are continually looking to help organisations to start their AI journey and we know that small-steps are preferable to giant leaps when it comes to adopting an AI-centric strategy. As such, we have developed a preliminary service designed for you. This is our AI Proof of Value (POV) offering.

Our POV will enable your organisation to quickly and cost-effectively understand how it could benefit from customised AI solutions. The POV examines the feasibility and potential profitability of using AI to identify opportunities and address challenges. We propose an AI strategy and recommend specific solutions. It is an in-depth study of your organisation, identifying what a program or single solution would look like, understanding the required investment, potential benefits and includes a cost-benefit analysis.

We **discover**, by understanding your needs and identifying any opportunities to exploit.

We undertake a **commercial & gap analysis**

We **analyse**, by evaluating your processes & data in terms of how it can offer new opportunities and how it can be further monetised;

We **create an AI Strategy** and propose specific solutions

We **report**, by identifying your knowledge gaps and preconceptions about AI;

We **assess the latest industry tech** and suggest how we can enhance it for you;

We **assess costs** and identify fiscal benefits;

We carry out a **competitor analysis**

Let us help you understand how AI might be deployed to help you achieve your objective.
