

Action for Pulmonary Fibrosis

Peer Support and Advisory Service Lead £34,000

Location: Peterborough or home based (with regular travel to the Peterborough office, post pandemic)

Are you looking for a new challenge? Are you passionate about enabling patients and carers to drive change? We are looking for an exceptional candidate to develop and deliver our **Peer Support & Advisory Service**, so that many more people find the reassurance, advice and information which helps them to manage the challenges that life with PF brings.

In the UK, 70,000 people live with pulmonary fibrosis, a progressive life-changing condition which limits a person's breathing, mobility and daily life. There is no known cure and little support for families who can feel very alone and anxious. We are determined to change that, by funding research to find a cure, campaigning for access to treatments, and providing information and peer support so that no-one has to face PF alone.

Building on the success of our support Line and telephone befriender pilot scheme, our new our service will develop a network of volunteers, including telephone befrienders and first responders and research champions.

Are you the person that can help us develop and deliver this service? You are likely to be a relevant health professional and/or have significant experience of running and promoting a helpline, volunteer programme or similar service in a health or charity context. If that sounds like you we would love to hear from you. To arrange an informal discussion about the role please contact Debra Chand debra@actionpf.org
