Urban Lite

Back to work

Do The Lite Thing

The new normal.

The way people are working has changed. With uncertainty around going back to the office, Urben will help you adapt to the new normal. We want to help businesses return to the office as safely as possible, whilst being able to work effectively without compromise.

Introducing the Urben Lite with integrated video conferencing software. An all-in-one appliance-based meeting room solution that's fully customisable, cost-effective and astonishingly easy to install.

32"-49" 4K screen

Vendor-agnostic

Appliance-based

Built-in storage with removable panel

Divide And Conquer

New ways of working.

New ways of working are emerging; smaller, more versatile meeting environments are now an essential.

Whether partitioning and repurposing unused auditoriums or downsizing offices, businesses are establishing multiple meeting environments that accommodate smaller groups of people.

These huddle spaces and small meeting rooms are the perfect environment for Urban Lite and Urban Nano.

Versatile and easy.

Urban Lite is super versatile and an out-of-the-box solution. It can be customised to suit you and rolled out in a flash. Simply screw to the floor and attach to the wall (brick, glass... you name it).

Meet Happy

All-in-one.

Easy-to-use software is the beating heart of an Urban Lite solution, and this powerful, user-friendly software demands equally powerful, easy-to-install hardware. Whether Zoom Rooms, Microsoft Teams, or any other platform, our appliance-based approach means the whole system is run from the video bar that includes the camera, microphone, speakers and software.

Fully customisable.

As with all Urban solutions, Lite can be fully customised to reflect your unique brand; any colour, any size, you name it. With a choice of three screen sizes and two all-in-one video bars, these solutions are standardised so you can upgrade your current setup in just 30 minutes.

Adaptation: The New Game In Town

Flexible working.

With in-person meetings reducing from 60% to 25% by 2024¹, businesses can no longer tolerate unused or sub-par meeting rooms. Agile work environments are essential; it is vital to have standardised, low-fuss, and easily installed solutions that enable virtual decision making.

Safety first.

Start a meeting from your own device to allow for contactless, safe meeting activation, whilst still collaborating just as productively.

Passionate Design From Industry Experts

Lite up your room.

Urban is passionate about providing multi-purpose meeting room solutions that are quick to install, cost-effective and address all your virtual collaboration needs. Lite is no different.

These solutions are fully bundled and pre-wired; it really is a plug-and-play approach. With the tech sorted in a flash, you can instantly adapt your existing office space to get your staff back to work quickly and safely.

Designed from floor to ceiling.

Enhance your huddle spaces by incorporating modern furniture for a complete meeting room design. Any combination of furniture can be used to maximise your space. Our acoustic panelling is perfect to enhance the look of your meeting room, but also reduces excessive background noise in open spaces and other meeting rooms.
