## IMPORTANT NOTES AND DISCLOSURES

The Russell Pure Style Indexes provide concentrated exposure to stocks that exhibit strong growth or value signals. Building upon Russell's traditional, cap-weighted style methodology, the Pure Style methodology is style-weighted, and effectively narrows the universe delivering a more tailored, 'pure' exposure to only those stocks considered fully value or growth.

Past performance of various investment strategies, sectors, vehicles and indices are not indicative of future results. Investing in equity securities involves risk including the potential loss of principal. Portfolios concentrated in equity securities may experience price volatility and other risks associated with non-diversification. While equities may offer the potential for greater long-term growth than some debt securities, they generally have higher volatility. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. There is no guarantee that risk can be managed successfully. There are no assurances performance will match or outperform any particular benchmark. Indices are unmanaged and not available for direct investment.
