

INFO SHEET

LEVPRO FOR MANUFACTURING

In a manufacturing facility or warehouse, every wasted square foot, misplaced tool, or lost part equates to inefficiency and lost productivity. LEVPRO is a unique system designed to save space on storage for tools, spare parts, inventory, and supplies while keeping items organized and at the ready - so your employees can focus on the activities that impact your bottom line.

LEVPRO uses pallet racking with shelving sections mounted to an overhead trolley on the beams, allowing shelves to slide together to save space and easily slide open to access your materials. The system even offers the ability to mount the shelves beneath your existing pallet racking. Both of these solutions allow you to utilize the space above the system.

HOW LEVPRO CAN HELP

- **Compact design** consolidates storage to make room for new equipment, additional workstations, or additional storage
- **A variety of accessories** allow you to get organized and spend less time searching for parts and tools
- **Improved organization** means saving money on unplanned reorders caused by misplaced parts
- **Ability to utilize your existing racking** saves money and promotes efficient use of space
- **"Levitating" shelves** make it easy to clean beneath the system so you can maintain a productive work environment

SPECIFICATIONS

No two manufacturing facilities are the same, which is why we offer a variety of sizes and accessories customized to your workflow and what you're storing. Start with a kitted system or let us help you build a customized range for your space.

Each standard kit includes pallet rack uprights, beams with tracks, trolleys, steel shelving units with handles, wire decking, and LED shop light(s). LEVPRO is offered in a variety of sizes, from 8'-12' widths, 7'-8' heights, and 3'-4' depths. Your local Spacesaver consultant can provide more detailed information and assist in space planning.

For existing pallet racking LEVPRO beam and LEVPRO trolley may be compatible with customer's existing teardrop pallet rack uprights, please contact Spacesaver to confirm compatibility. Two LEVPRO beams are required along with the trolley and shelving sections.

Note: LEVPRO beam and trolley can only be used in 7' or 8' height positions on the pallet rack uprights as the space below will be occupied by carriages.

Utilize storage space above LEVPRO Storage system

Make better use of the space under your existing pallet racking

SYSTEM ACCESSORIES

- Additional handles (to allow users to move shelving from either side)
- LED Shop light(s)
- Wire Decking
- Standard beams for additional overhead storage and capacity
