

CATCH UP TV FOR YOUR CONFERENCE

## **Talking Slides Plus (Remote Recording)**

### **Fact Sheet**

## What is Talking Slides Plus?

Talking Slides Plus is our conference capturing solution that allows delegates to browse your conference programme and watch all presentations on-demand, on your very own custom branded Talking Slides Hub. In essence - Catch Up TV For Your Conference!

This has been our most popular conference capturing solution for many years, however, in the recent climate, we have adapted this to allow us to record all presentations remotely, so events and meetings can still take place in the virtual world.

As explained in full below, once talks are captured, they are edited and uploaded online for your delegates to view, which has proven most useful for many of our clients during this time, as everything can be recorded and viewed from home.

## How does it work?

Presenters are invited to record presentations online with support from the team at Talking Slides. One of our highly experienced and super-friendly technicians will meet them in a virtual meeting room, ensuring their camera placement, room lighting and audio etc are all correct, enabling us to record presentations to a standard all involved can be proud of.

We will stay connected with each presenter throughout their recording, ensuring they are confident, also providing the opportunity to re-record any portion of their talk should they have any mishaps.

Following each recording, post-production will see each talk edited down into an impressive multi-window, custom branded presentation video to match the scheme of your conference, as per the example below.

We will then upload all content to your very own custom branded Talking Slides Hub, incorporating your company and event's branding, as well as your sponsor's logos. There are many opportunities for sponsor's branding to be incorporated into the site - in fact, many of our clients find our service to be funded or part-funded in this way.

You simply need to pass on the web address to your delegates. E.g. yourconferencenamehere.talkingslideshd.com or a link directly from your own website.

When delegates arrive on to your Talking Slides Hub, they will be prompted to register, enter their contact and organisational details. Once registered, they will be able to browse through all conference content and view desired presentations at their leisure.

Underneath each of the presentation videos, there is a comments thread, allowing delegates to leave comments or ask questions. Each comment can be individually replied to by the presenter or other delegates.

## **Optional Extras**

### **CPD Online Assessment Modules:**

CPD assessments can be applied to each presentation in order for delegates to qualify for the relevant CPD points. Delegates can download their certificates directly from your Talking Slides Hub when they have successfully passed.

### **Pay-Per-View:**

You have the option as the conference organiser to charge delegates to view the content. You may set up a destination to receive payments using one of the below systems:

- NoChex
- PayPal
- Taxamo/Strike
- Worldpay

You simply need to provide the relevant login/credentials for the above, with all revenue sent directly to that destination. We embed the facility into the Talking Slides website with all income sent straight to you.

### **Tiered Pricing:**

When you couple Pay-Per-View with 'Tiered Pricing', this will allow you to provide different levels of pricing for access to your e-conference. For example £35.00 for members and £70.00 for non-members.

### **Speaker Biographies:**

This option allows the addition of speaker biographies to be added to each presentation, to enhance the overall look of your site. Information can include bios, hyperlinks and photographs to be displayed alongside the relevant videos.

## **Options & Pricing**

### **Talking Slides Plus w/Remote Recording:**

- Custom Branded Talking Slides Hub
- All Content Hosted & Managed by the Team at Talking Slides
- 6 Hours of Recording (To Reflect 1 x Conference Day e.g. 12 x 30 Minute Presentations)
