

Dermatology, simplified.

Ensure every person with a skin issue gets the best possible care, every time.

Piction Health™ saves time and money by empowering every clinician to instantly identify skin conditions using AI.

Accuracy with Piction Health¹

Identify skin conditions the first time

Increase patient satisfaction

Save minutes per visit

Save \$450 per case²

“It’s almost a running joke in our company that when we share a skin case among colleagues and ask for help, no one knows what it is. You ask 5 people and get 5 different answers. Skin is really hard, and it’s even harder in telemedicine. I want this to be easier to diagnose, treat, and give patients the right answer.”

- Primary care physician practicing telemedicine in Maryland
