

## Kodi Setup Guide

### Kodi V.17 & Up

1. Open Kodi and select "TV".
2. Select "Enter add-on browser".
3. Select "PVR IPTV Simple Client".
4. Select "Configure".
5. Select "General"
6. Set location to "remote path (Internet Address)".
7. Enter your m3u url under "m3u playlist url" and click "OK".
8. Select "EPG setting" and fill in your EPG url and click "OK".
9. Click "OK" again on the settings screen.
10. Click "Enable" at the bottom right.
11. Now go back to the home screen and select "TV" again.

### Kodi V.16 or Lower

1. Open Kodi
2. Select "System".
3. Select "TV" (or "Live TV" if you are on a version lower than 15.2 and if you are, please consider updating).
4. Select "General".
5. Select "Enabled". You will now see a pop-up saying that you have no PVR Client enabled.
6. Select "OK".
7. Scroll down and select "PVR IPTV Simple Client".
8. Select "Enable".
9. Select "Configure".
10. In General select "M3U PlayList URL".
11. Add your M3U URL into the "address section"
12. Select "OK".
13. Select "OK" again.
14. Reboot Kodi.
15. On your Home Screen, you should now see "TV" (or "Live TV" if on an older version of Kodi).
16. Open that to see the live channel list.
