

Smart TV/Fire Stick Setup Guide

Please see the below setup guide for Smart TV and Fire stick using the SIPTV app. If this setup does not work on your TV please email our support team at support@enterstream.net so they can assist you.

These devices use an application called 'Smart IPTV', this app is free to use for a period of seven days, you will then be asked to make a one-time donation of €5.49 (Euros) towards the Smart IPTV app development.

1. Go to the app store on your smart TV and search for and install the Smart IPTV application.
2. Launch the Smart IPTV app.
3. Make a note of the MAC Address which is displayed on the screen.
4. Go to <http://siptv.eu/mylist/> from any web browser.
5. Go to the section "Add external playlist links (URLs)" and enter your Mac address and your m3u URL into the "Link" field (Your MAC must be in capitals).
6. Ensure the "Countries" drop-down selection is on "Various".
7. Check the "Keep online" checkbox.
8. Click on the "Add Link" button.
9. Restart the Smart IPTV app and your channels will start to load.

In order to view channel groups, press the blue button on your remote control.

NOTE: If you reopened the application, and did NOT receive any channels, please go to <http://siptv.eu/mylist/> and enter your MAC Address on the last box called "Reset Playlist". Then click "Reset". After you reset, repeat from step 5.
