

The Carbon Community: Environmental Policy

The Carbon community The Carbon Community (TCC) is a registered charity with a focus on accelerating capture carbon in tree and soil with breakthrough science. To deliver this we plant trees in controlled field trials, we fund primary research in trees & soil, we share our findings both at a grassroots level and with strategic decision makers, and we advocate advanced planting techniques for trees everyone at scale..

Through everything that we do, The Carbon Community will endeavor to have a minimal impact on the environment. Wherever possible we will ensure that:

- Our projects
 - Track the carbon impact of our projects from start to finish.
- Energy Use
 - Electricity will be sourced from renewable suppliers
 - Minimise travel wherever possible and encourage low impact travel.
- Goods, Services & Waste
 - Purchase goods & services that cause the least harm to the environment.
 - Avoid Waste – promoting conservation, reuse and recycling where appropriate
 - Strive for all materials, sponsors and suppliers to have the lowest possible environmental impact.
- Awareness & Understanding
 - Share our learnings around carbon capture at the grassroots level as well as with strategic decision makers.
 - Promote understanding and participation in environmental issues
 - Work with and encourage other organisations, companies and sponsors to protect the environment
